England granted \$4,000,000,000 to replace the Bourbons on the throne of France. The interest of this sum, at 5 per cent, would be \$200,000,000 annually; which would go so far to place the Saviour on the throne of this alienated world, as to support a standing army of 400,000 missionaries of the Gospel in Pagan lands and Christian lands paganized by systems of grinding oppression and moral degradation. The interest of the money would build 10,000 miles of rail-road every year, until the habitable globe were intersected by the iron highways for the nations. The amount or principal, if divided among the 214,000,000 inhabitants of Europe, would put \$18 69 cents into the hands of every individual!

In Italy there is one insane man to 4879, in France one to 1000, Wales one to 800, England one to 862, Scotland one to 574, Russia one to 666, United States one to 500. Amongst the Chinese, insanity is almost unknown. 7th Month
