Bulletin.

TOKIO. Mar. 10 .- Fushan was occupied by the Japanese last night. The fighting continues on the heights north of Fushun. Bulletin.

WASHINGTON, Mar. 10 .- Fushum tas been captured by the Japanese forces according to the following cablegram received by the Japanese legation from Tokio under today's date. "Our detachment occupied Fushun on the night of March 9th and now are attacking the enemy who is posted at the angle of the heights north of Fushun.

Bulletin.

NEW CHWANG, Mar. 10 .- According to relibale information received here the Russians having been driven out of Mukden and Fushun are retreating in a demoralized condition to the hill country towards the northwest.

Detached bodies of Russians are strongly entrenched with a view to checking the pursuit but no great rear guard action is being fought. It will be impossible for the Russians to keep up any sort of resistance for many days as there are now no means of provisioning in the rough country through which they are retreating. \$1 s believed that the Russians may at tempt to reach Kirin, 225 miles northeast of Mukden through the valleys but a special Japanese corps from the direction of the Yalu river (probably Gen. Kamamura's force) threatens to head them off. Gen. Kuroki is advancing northwest and is forcing the Russians against Gen. Nogi's army.

The casualities on both sides have been enormous. The Russian sixteenth army corps was practically annihliated BERLIN, March 10 .- Military writers ere, discussing General Kuropatkin's at Tatchekiao. Eight thousand Rusians fell at Leukuanpeo. situation, admit its extreme serious-

## **Paralysis Foretold By Bodily Weakness**

Not Weakness of the Arms and Legs Merely, But Also Weakness of Such Vital Organs as the Heart, Lungs, Stomach, Liver, Kidneys and Bowels.

Every movement of every muscle in the body is accomplished by the expenditure of nerve force.

The breathing of air into the lungs, the throb of the heart as it pumps the blood through the body, the churning motion of the stomach, and, in short, the whole working of the human system, is the result of muscular contraction, which is only possible by the influence of nerve force.

Once the nerve force runs low and is con- Irritability sumed by overwork, worry or disease more Noises in the Ears rapidly than it is being created, there comes weakness and ultimately paralysis of some Sudden Starting from Sleep part or of the whole body.

Paralysis can usually be cured, and it can always be prevented, by the use of Dr. Chase's Nerve Food, which restores health and strength by actually forming new, rich Numbness of Any Part blood and creating new nerve force.

In women weakness of the nerves frequen'y takes the form of derangements of the populiarly feminine organs. In men nervous exhaustion is often manifested by headache, brain fag and indigestion.

Symptoms: Brain Fag or Headache

Irregular Sleep Unnecessary Anxiety Twitching of the Nerves or

Muscles Sparks Before the Eyes

Pains described as Rheum-

atic, Sciatic, Neuralgic Restlessness of Movement

Loss of Memory Inability to Concentrate

the Mind Weakness of Bodily Organs

Dr. Chase's Nerve Food is composed of the most powerful nerve and blood restoratives that are to be found in nature, and, acting as it does according to nature's laws, cannot fail to be of benefit to you.

The time to begin the use of Dr. Chase's

Nerve Food is when the symptoms mentioned here are first noticed. Then only can you be

sure of preventing paralysis.

By this treatment the depleted and shrivelled nerve cells are filled with the vital nerve force which runs the machinery of the body, and strength and vigor take the place of weakness and disease.

Through the medium of the blood and nerves Dr. Chase's Nerve Food reaches every nook and corner of the human body, and strengtheas and invigorates every organ of the human system.

You can feel yourself getting strong and healthy when the new nerve force is sent tingling along the delicate nerve fibres by this great food cure, and by noting your increase in weight you can prove that new fiesh and tissue are being added.
