Was Not Able To Walk For Three Months.

Was Given Up to Die. The Doctor Said So.

Saved, Her Life.

Read what Mrs. Wm. Castilloux, Newport, Quebec, has to say about Burdock Blood Bitters :- "Last December I fell very sick after confinement. I was not given up to die by the doctor. My hus band read of the many wonderful cures made by Burdock Blood Bitters,-so procured me two bottles. After using it for and could mind my baby without help from anyone, and am now well, and able to do my own work. I told a lady friend of mine who was troubled in the same way, and she used it with equal success. I cannot too highly recommend your medicine, for I know just how good it is, and hope and wish that anyone suffering as I did will give it a trial."

Started at Once.

According to the reports of the party able to walk for three months, and was who have been visiting the Norton coal mines during the past week it looks as though a fleurishing industry space of a few months. These mines, which are situated on the Baxter farm, about a quarter of a mile from about ten days, I was able to get around, the Norton road, and less than two miles from Hampton Village, have been recently taken over by the Maritime Coal Company. This company mostly in the state of Massachusetts. The party who since last Menday has been exploring these mines consists of B) A. Osgood of Wakefield, Mass., manager of the company; N. E. Cutler, president; Professor S. T. Peck-ham of New York, and Dr. Peckham,

Professor Peckham is the chemist of the commissioners of accounts for New York city. He practically occupies the position of chemist for the city. As a mining expert he is count-ed among the best in the United States. Prof. Peckham has been engaged by the company to inspect the Norton mines and to make a test of the coal. He has during the week collected a large stock of samples, which he will take back to New York for the test. The progress of the mine now depends almost wholly on this test. If it proves favorable, as Professor Peckham and the promoters confidently expect, the company will begin operations right away. The mineralogist seems to have little doubt but that the ceal is of a superior quality. He will be able to say, however, with certainty in a couple of days. The party will leave for their homes today. If the coal stands the test the manager and president will return in a month's time prepared to operate the mine. Mr. FOR DIVORCE. OLD PARR.

Most Remarkable Longevity Case On

Record.

"Old Parr" and his family, all things considered, is the most remarkable authentic example of longevity on record. writes S. G. W. Benjamin in the Washington Star. Thomas Parr, the old, old, very old man of Winnington, in the Hield Cottage parish of Alderbury, Shropshire, was months and flied at Westminster, Nov. 15, 1625. It may be generally assumed that when an individual has lived in etery. one community a lifetime and obtained the reputation, of great age there is a consists of several members, living substantial basis of truth in such a six young men, came over from Saint reputation, especially when there are George on Thursday in Meating's strong corroborative facts in favor of

it. In the ease of "Old Parr" among other such incidental facts, the following may be quoted: Such was the fame of this centenarian for extreme age that Thomas, Earl of Arundel and Surrey, and Earl Marshal of England, proposed to run him a journey to London as a curiosity, provided him with a litter and horses and entertained him there free of cost until his death soon after. Crowds of people thronged the roads to see the old man pass.

Again it is on record that he made three successive feases of 21 years each for a dwelling, or 63 years and then renewed the lease for life. The last lease terminated after more than fifty years showing a continued occupancy of the same house, after he reached maturity, of more than 113 years: This longevity was hereditary in the family of "Old Parr." His son lived to the age of 113, his gradsen to 103 and his great grandson to 124. There is no substantial reason to doubt these Against the keen, low, throbbing sky; facts, which occurred in a civilized and intelligent country.
