1. In checking our aircraft files against the Civil Aircraft Register dated September 5, 1958, it was noted that the marginally noted aircraft is not listed.
2. As our file with respect to this aircraft contains correspondence as late as some fourteen months ago, and does not indicate that the aircraft has been damaged, may this office be advised whether or not the omission of this aircraft from the Register was intentional so that we may amend our records if necessary accordingly.

Regional Director, Air Services,
Toronto.
