

Robert Nelson, and more recently to Dr. Bouthillier, M.P.P. To prove the estimation in which the lectures of the Faculty have hitherto been held by the French Canadian Students, the following statement, extracted from the Register of Matriculations is submitted :

From 1824 to 1844—total number attended,.....	442
Of these of French Canadians, there were,.....	164
“ British, there were,.....	278
	— 142
Making over one-third French Canadians.	

Since resumption of Lectures in 1839—total number,.....	194
Of these French Canadians,.....	89
“ British,.....	105
	— 194
Making nearly one half French Canadians.	

The aggregate attendance during the two last sessions was.....	84
Of whom were French Canadians,.....	43
“ “ British,.....	41
	— 84
Making more than one half French Canadians.	

The above statement will prove that the delivery of Lectures in English does not deter French Canadian Students from attending them, a fact which is also confirmed by the great number of that class who annually resort to American Schools for the purpose of graduation.

In conclusion, the Medical Faculty have to state that certificates of attendance upon their Lectures are accepted for graduation, as equivalent to their own, by British and French Colleges, an important privilege and a great saving of expense to Students who wish to extend their education by visiting these countries.
