

This Beaver Gang will Reduce Your Plowing Expenses 40c. on Every Dollar Plows Better-Quicker-Easier

WHY use two ordinary walking plows, pay two skilled men and keep four horses working hard, when there's a better way?

Simply hire any lad who can drive, hitch up three horses to this Beaver Gang and tell the boy to go ahead.

He needn't be an expert—the plow is so simple and easy to operate.

And this Gang plow will make better furrows, plow quicker and save you nearly half your plowing expenses, than if you used two ordinary walking plows. Read about the Beaver in our Catalogue.

COCKSHUTT BEAVER GANG

Beaver Gang No. 1—Wheels of this Gang are always under control of driver, and this, combined with our straightener device, enables the operator to keep an absolutely straight furrow. The cushion spring on land wheel axle arm, takes the strain off the wheel when striking obstructions in rough work. The high beam ensures good clearance. This plow is also built with adjustable beams, which can be set for wide or narrow work.

Our new lifting spring for furrow wheel makes it possible to raise the plows without effort. The land wheel is extra large, making the plow run steady and easy. Can be supplied with wide or narrow bottoms, knife colters, shares, triplices and wrench. We cannot recommend this plow too strongly to farmers who want good work done quickly and cheaply—the great demand we have for this Beaver Gang is sufficient proof of its efficiency.

This Plow Draws as Light as an Ordinary Walking Plow

This Beaver Sulky has all the features of the Beaver Gang. The beam for carrying the plow is made of extra heavy high carbon steel, making it a perfect plow for hard work. The wheels are absolutely dust proof, are always under the control of the driver, and are so arranged that the plow will automatically adjust itself to the

Does Better Work — Ensures Rest for Driver

unevenness of the ground. The land wheel is extra large—a great advantage in operating the plow. The plow can be easily raised by means of our new lever and spring lift and bottoms can be supplied to suit any soil. This is without question the lightest draft sulky plow made and we know it will give full satisfaction under all conditions.

This New Footlift Sulky Leads All Others

For clay land we recommend our Judy bottom, which turns a furrow from 7 to 10 inches wide. For loamy soil our No. 21 bottom is most suitable—it turns a furrow from 10 to 12 inches wide. The excellent reputation of these bottoms make detail unnecessary.

The distinctive feature of this plow is the **FOOTLIFT ATTACHMENT**. The levers are within reach, but need only be used to give the plow the width and depth of furrow, for once the plow is leveled, it is operated entirely by the footlift attachment, thus leaving the

operator's both hands free to manage the team. A special device locks the plow up when raised from the ground, and locks it down when set for work. Can be fitted with rolling colter, knife colter or jointer. This Footlift Sulky is away ahead of any other sulky plow in America—it is up to the minute in improvements, and will easily outclass any other sulky plow on the market.

Let us arrange with one of our dealers to show you this implement, because we know that its superiority will be readily appreciated.

The "COCKSHUTT" Catalogue is a safe guide for all implement buyers. You need it NOW, before you decide on the plow you will buy. It will be too late after you have bought. Save money and regrets by writing to-day.
