PRODUCTS OF A WESTERN CANADIAN FACTORY WORTH INVESTIGATING

7 h.p. Gasoline Engine with
Conical Reversible Plate
Floor or Low Down Grinder
and Rubber Belt.

For 15 years this 7 h.p. engine has been saving money for the Farmers of Canada and the United States. Desired by many because of its simplicity and compactness. No size, style or make better for running your grinder or wood saw.

7 H.P. Engine with 8 in. Grinder and 30 ft. 6 in. Rubber Belt.
Brandon Price **\$170.00**

Calgary Price **\$190.00**
10 in. Grinder furnished for \$5.00 extra.

Engine only.
Brandon Price **\$135.00**

Calgary Price **\$150.00**
Furnished with battery ignition and plain pulley only.

TERMS—Cash with order or sight draft against Bill of Lading. Every outfit guaranteed satisfactory or your money refunded, as well as freight. Purchaser to have 30 days' free trial.

Engine only, with Batteries
and Plain Pulley—

F.O.B. Brandon **\$127.50**

F.O.B. Calgary **\$140.00**

Hand Trucks, \$12.50 extra.

ROLLER CRUSHER

2 Roll Crusher, Brandon \$44.00; Calgary \$49.00
3 Roll Crusher, Brandon \$59.00; Calgary \$65.00
12 inch Rolls.

We recommend the 2 Roll for the 5 H.P. and 3 Roll for the 7 H.P.

5 H.P. with 7 in. Floor or Low Down Reversible Plate Grinder and 25 ft. 5 in. Belt.

F.O.B. Brandon **\$160.00**

F.O.B. Calgary **\$175.00**

This engine with 7 in. grinder makes a good combination.

MANITOBA ENGINES LIMITED

**BRANDON, Man., and
CALGARY, Alta.**

PROTECTING RASPBERRIES

Winter protection is necessary to insure a crop of raspberries in the West. In some cases the mere laying down or bending over of the canes to protect them against the cold and drying winds is all that is necessary, tho the safest and most efficient way is to bury the canes, that is, cover them with soil to a depth of three or four inches. The covering should be done as late as possible, but before the ground is frozen. Select days during which there is no freezing temperature; otherwise the canes are apt to break when bent to the ground for covering. With some varieties having strong and brittle canes it is often necessary to remove a spadeful of soil from the side of the cane towards which the canes are bent and in extreme cases the soil is removed on both sides. Generally only enough earth is used to completely cover the canes, and success is dependent not upon the thickness of the covering, but upon the completeness of the cover. Straw manure will serve the same purpose as earth, if obtainable in sufficient quantity to make a complete covering.

The canes should be uncovered as late as possible in the spring to avoid early spring frosts, yet the covering should not be permitted to remain too long as it is apt to injure the young growth. Ordinarily when the buds have well started the covering should be removed. Care should be taken in uncovering so as not to break or otherwise injure the canes and the soil should be leveled off completely; otherwise in a few years the bushes will stand on a ridge and the feeding area of the plants is greatly decreased.—E. P. Sandsten, Colorado Agricultural College.

When putting away a machine for the winter make a note of any repair parts wanted and attach it to the machine. Some day in the winter you can take this to town and get the necessary repairs. Be prepared.

When thru with the plow, cover the moldboard with any good heavy grease that will keep the air away from it and put it away. The same treatment to the disc harrow and cultivator shovels will protect them.

The Very Latest—Buy Direct from the Manufacturer

Here's What You've Been Waiting For

This exquisitely piano-finished "Phonolian" in either quarter-cut oak or genuine mahogany, together with 24 selections of your own choice

\$10 Cash
\$8 Monthly **\$85** Or Terms arranged to suit your convenience

Just placed on the market—an entirely Canadian product with many exclusive features and all latest improvements. Never before has such a machine (exactly like the illustration) been offered at anything like this money. Being an entirely Canadian product

You have not the Extra 37½% Duty to Pay

Many Exclusive Features

This new instrument plays any disc record and has a patent automatic start and stop and absolutely noiseless wind with tone chamber constructed on correct acoustic lines giving tonal production equal to machines costing \$200.00 and more.

Dimensions: Height 47 inches; Depth 22 inches;
Width 17½ inches

Manufactured and sold exclusively by
