IT DIDN'T WORK.

A man who had been out of work for a long time suddenly recollected reading a long time suddenly recollected reading a story of a clerk who applied for a situ-ation. He was courteously told that there was not a vacancy, and, as he turned away, he stooped and picked up a pin from the floor. The employer, struck by the action, called him back, and said: "You seem a careful sort of man. Call back to-morrow and we will give you a job."

Our hero therefore determined to copy this man's example, and next day saw him standing before a large manufacturer, having previously dropped a pin on the floor. Getting the usual reply that there was

Getting the usual reply that there was no vacancy, he turned away, and then, like the other man, stooped and picked up a pin. But the result was different. "Here, Henry I" shouled the employer, to his servant, "see this fellow off the premises! A man who steals a pin would steal anything !"

MERELY OVERLOOKED.

MERELY OVERLOOKED. The ways of the crank with an in-vention are unaccountable. Here is a recent actual example: A brisk, eager individual called on a capitalist for the purpose of interesting him in a device for discouraging burglars. "I want to get the idea patented," he said, "and I haven't any money. I'm willing to go halves with any man that will give me the financial backing. "My scheme is this. You first make your doors and windows secure, so that they can't be opened at all from the cutsido—there are plenty of devices for doing that now-adays. Make all of them tight and fast, except one. Leave that one so that it will open easily. Then run a wire from that window to the head of your bed, where you have an alarm-bell. The burgler comes along, tries the doors and windows, and when he comes to that one he along, tries are doors and windows, and when he comes to that one he reises it. The alarm goes off and the burglar hears it and flees, or it wakes you up and you are ready for him. In either case it accomplishes your pur-

"But," said the capitalist, "if you can make all the doors and windows fast except one, why not make that one seeure, too, and thus keep the burglar out entirely?"

"I never thought of that!" replied the inventor, rubbing his jaw. He didn't get the money.

Scratching is feelish: it only makes a bad matter worse. Weaver's Cerate allays the pain, leans the skin of eruptions and other sores; Why not buy a bettle to-day?

"To be quite candid, Sir, that fellow you seemed so gone on was the most unspeakable little ass in the room!" "George! You forget yourself!"

Tis a Marvellous Thing.—When the cures effected by Dr. Thomas' Eclectric Øi, are considered, the speedy and per-manent relief it has brought to the suf-fering wherever it has been used, it roust be regarded as a marvellous thing that so potent a medicine should result from the six simple ingredients which enter into its composition. A trial will convince the most skeptical of its healing virtues.
