#### THE AUGUST ROD AND GUN

No better number for a delightful holiday month has been issued than Rod and Gun in Canada for August published by W. J. Taylor, Limited, Woodstock, Ont. In the opening story "From the Log of a Nautical Tramp," the holiday spirit prevails and is prevalent through the two following papers—Luxurious Trout Fishing and Up the Magnetawan, a River of Dams. In addition there is an abundance of other material, articles and stories dealing with fishing, deer, moose and bear hunting while other phases of outdoor life receive recognition and treatment in a manner that must appeal to all sportsmen. This is particularly the case with the little paper on the subject of wounded game and a pioneer's stories while the conclusions of the Commission inquiries into the fisheries of Alberta and Saskatchewan must interest anglers all over the Dominion. The paper on a New Use for the Red Fox may not only create a new interest in fox hunting but also lead to an extension of the fox farms which have proved such a success in Prince Edward Island and in Middlesex county in Ontario. Altogether it is a number which no sportsman should miss.

Within a few weeks four students of the Kingston Business College were appointed to positions with the Dominion Government at Ottawa and one received an appointment with the Government at Regina. This speaks well for the students and the college.

#### Alfalfa and Timothy

The Agricultural College of Illinois conducted an experiment for the purpose of determining the relative value of timothy and alfalfa as feed for dairy cows. Sixteen cows were divided into two lots of eight cows each for the purpose of the experiment. The other portion of the ration for both lots was exactly the same, 10 lbs. of corn stover and 12 lbs. of grain. Then a direct comparison was made between alfalfa and timothy hay. The results showed alfalfa hay to be worth \$10.86 per ton more than timothy hay. The average yields per acre obtained in Illinois are approximately four tons of alfalfa hay and one and one-half tons of timothy. When timothy hay is worth \$10 per ton, one acre of alfalfa is worth \$68.44 more than an acre of timothy, under the conditions which existed in this experiment and when milk is sold at \$1.80 per 100 lbs.

—Farm and Dairy and the Athens Reporter will be sent one year to any address in Canada for \$1.50.
