**Household Notes**  
When lamp chimneys are washed with soap they are liable to crack. This is not necessary. By holding them in the steam of a boiling kettle for a moment and then rubbing them with a clean cloth, they are easily cleaned.  
The careful housekeeper should look into her bread box every day as religiously as she goes over the refrigerator, saving the pieces that are suitable for toast and putting the smaller pieces away to dry for bread-crumbs.  
Delicious steamed oysters are made in the following way: Steam the oysters until they are just heated through and serve them on toast cut in rounds; moisten the toast with the oyster juice and then cover with the oysters.  
If lemons have become dry, do not throw them away. Put them in a pan of hot water and put it where it will remain at almost the same temperature without boiling for two hours. After that the lemons will be soft and juicy.
