OPTIMISM!
The general level of Wall Street's temperament is usually taken as a safe indication of coming events. For Wall Street bases its conclusions on fundamentals and refuses to be misled by unsound theories.
The speed-ahead movement began with bonds. Then it spread to stocks and for over a month has witnessed an ever-increasing demand for shares.
Obviously therefore, the profitable policy for the investor is to acquire attractive issues now, rather than pay a profit to those who will buy them now. At least that is Wall Street's idea and Wall Street is usually right.
This Company has every facility to serve you well.
