Catarrh-A New Mode of Treatment. From the Weekly (Toronto) Mail, Aug. 24. Perhaps the most extraordinary success that has en achieved in modern medicine has been attained by the Dixon treatment for catarrh. Out of two and patients treated during the past six housand patients treated ultring the pase the souths fully ninety per cent have been cured of his stubborn malady. This is none the less start-ing when it is remembered that not five per cent of atients presenting themselves to the regular prac-itioner are benefited, while the patent medicines

titioner are benefited, while the patent medicines and other advertised cures never record a cure at all. Starting with the claim now generally believed by the most scientific men that the disease is due to the presence of living parisites in the tissue, Mr. Dixon at once adapted his cure to their extermina-tion—this accomplished, he claims the catarrh is practically cured and the permanency is unques-tioned, as cures effected by him two years ago are cures still. 'No one else has ever attempted to cure catarrh in this mainer, and no other treatment has ever cured catarth. The application of the remedy is simple and can be done as home, and the present reason of the year is the most favorable for a specify and permanent cure, the majority of cases being cured as one treatment. Sufferers should corres-pond with Mr. A. H. Dixon. 305 and 307 King street west, Toronto, Canada, and enclose stamp for his treatises on catarrh. 28

the most improved Medicated Inimations, Cert bined with proper constitutional remedies for the Ivery 40,000 cases succ.ssfully treated during the past sixteen years for some form of head, throat or lang troubles. There is no disease with which the human family is afflicted so deleterious in its effects, so loathsome to the sufferer, and so fatal in its consequences, and yet so neglected as catarth. The danger of 'isre-gate is realized by few, and still less are they aware of the many diseases entailed upon them, and of which catarth and earlier symptoms of the dis-case is realized by few, and still less are they aware of the many diseases entailed upon them, and of which catarth and earlier prevailent to an alarming extent is bronchitis, laryngtis, aphonia, asthma, and other dangerous ffections of the throat and chest. You may think that we we give ur due importance to these trifles, but go to those among your friends who are now in the last stage of con-sumption and ask them how their disease began. They will in almost ever, instance tell you of a slight od'd, shacking cough, or a little soregaes in the throat, which were trated as eacroly worthy of notice a few months ago, and will add their cought in the throat, which were trated as eacroly worthy of notice a these undering from diseases of the head, throat and chest to aconsciousness of their true state, they bave journeyed onward to the brink of the point to which we would advert—that is the unwill-danger until the disease has reached an advanced state. Many less their lives by waiting to see what will become of their cold and catarth. Nothing is gained by fearing you cannot be cured. Never pive way to dispair or listen to the advice of a nar-row minded person who has but one routine, never cured a case, never saw a case cured, never knew of any other treatment but his, has but one ide, a mal who would discourne you from ever tript to get WANTED-BOOM WITH OR WITHOUT board with quiet family, suitable fer two students.
