

DR. SENIOR: "It is really quite a trick to apply the Antiphlogistine jacket in pneumonia, Doctor."

DR. JUNIOR: "Yes I was stumped, at first; that is before the nurse came down and I ordered the jacket put on, as you suggested yesterday, when I saw you."

DR. SENIOR: "I was glad to find one of my old nurses in charge of the case. She has had a lot of experience—the first time she worked with me in pneumonia—some twenty years ago, when many doctors and nurses did not know about Antiphlogistine, - I had to do the job myself."

DR. JUNIOR: "Well, I was wondering this morning, after I had decided to try Antiphlogistine in pneumonia, how the —!— that is I —"

DR. SENIOR: "Now you know, I guess! That is—you know how the jacket is put on and, how comforting it is to the patient."

DR. JUNIOR: "Yes, and more than that, Doctor, the temperature has gone down nearly three degrees since morning. Now—before you go: How long shall we leave it on?"

DR. SENIOR: "Miss Hope knows. But, you send to The Denver Chemical Mfg. Co., 20 Grand Street, New York, and ask for their booklet on how to use Antiphlogistine—now!—don't feel that you are asking a favor. The Antiphlogistine people will also send you a copy of their valuable brochure "The Pneumonic Lung."
