**FEBRUARY 24 1914** 

Various Reports Are Current in Regard to His Estate.

OWNED PROVIDENT CO.

Stock Was Transferred Before His Death and Escaped Duties.

Various reports are current in regard to the estate of the late Senator Cox, probated last week at something below a million dollars. But the esbelow a million dollars. But the es-tate was only small at the time of death, because the senator divided the bulk of it a very considerable time ago. He must have had six or eight million dollars invested in the highest class of securities and real estate and held outright by the Provident Investment Co., of which he and his immediate family were the owners and directors. This company, it is believed, held the controlling shares of the Canada Life, and large blocks of shares in the Can-ada Central, Dominion Savings Co., National Trust, as well as a lot of real estate. It is believed that eight-tenths of the \$100,000 capital in the holding company went

tenths of the \$100,000 capital in the holding company went to the two sons and the other 200 shares to other members of the family, and that the transfer of these shares was absolute and made outside the limit provided in the Suc-cession Duties Act. And other proper-ty which the late senator was at one time seized of was similarly disposed of. Senator Cox five years ago was worth in the neighborhood of ten mil-lions; but about that time he gave the bulk of it to his family, as by law he had the right of doing. LONDON, Feb. 24.—The Standard editorially expresses discontent at what it considers the British foreign scoretary's mild attitude toward the United States and says: "Sif Edward Grey seems inclined to treat the murder of Benton with cool philosophy, altogether out of harmony with the feelings of the nation. We desire to remain on the friendliest terms with the United States, but can-not weive the duty of protecting our nationals abroad, or we shall cease the be a great power. And we cannot per-mit the crime to go unpunished mere-dy because President Wilson and Sec-retary Bryan may conceivably adopt

-and the chances are that it will-February, 1914, will have the honor of being the coldest month in the history of this city. Several weather records have been broken already this season and the weatherman apparently sees no reason why he should not add another to his list. The mean temperature of the first twenty-two days of this month has been lower than in any previous month in the records at the meteoroogical office. The average temperature for this period has been 7.2 degrees above zero, being 14.5 degrees below normal. Yesterday morning the mer-eury dropped to 8 below zero, which, however, was much higher than on the coldest day of the year, Jan. 13, when the thermometer peristanced 29 below

thermometer registered 22 below. Warm in the West. Having its origin in the Canadian west late Friday night, the cold wave swept thru Alberta and Saskatchewan, cars

and yesterday swooped down on Mani-toba and Ontario, leaving the province to the west with comparatively mild weather. While Ontario generally ex-perienced the coldest weather in Canada Yesterday. Toronto did not get the worst of it. White Riverites were obliged to so to work with the mercury hovering between 44 and 45 degrees below the dividing line, while Cochrane register-

There are many Toronto people who would be pleased to see the thermome-ter register something above the freez-ing point for a change, but the weather-man seems to have decided to establish record, and it is up to Toronton ans to humor him for a few days.

COST OF LIVING REDUCED.

There is not a man or woman Canada who is not interested in re-ducing the cost of living. It is the universal cry at the present time. A new enterprise has just come to

Canada which will very materially reduce the cost of a universal household article. When an article costs Canadians 35

States for 25 cents, we begin to won-der why, especially if it happens to be something that everybody wants. Sloan's Liniment has become so popular in Canada that people here demanding that they might purchase it on this side of the line just as reasonably as those living on the other-side. There was but one way to

meet this demand, and that was to open a Canadian factory. The Dr. Earl S. Sloan, Inc., has stablished a branch factory in To-ronto, to make this product and sell it at the same price charged in the United States ted States.

It is a pleasure to see high-class stries of this kind located in Can-
