Varicoccle of 12 Years' Standing Cured

W. C. Mason of Jackson, Micb., writes as follows:

"I cannot say too much in favor of the New Method Treatment. Improper liabits at an early age laid the foundation of my trouble. At 20 years of age Varicoccle developed, I gradually became nervous and despondent, lost all interest in my work, and, in fact, in life. When I rose in the morning I felt tired and sore. My memory failed me and I felt dull and stupid. Imaginative dreams at night weakened me. The Varicoccle caused a dragging sensation in the loins, weakness over the kidneys and a debilitated condition of the pelvic organs. I had nervous debility and was bordering on paralysis. For 12 years I treated with a score of different doctors, tried all kinds of patent medicines, plasters, lotions, pilis, electric belis, etc. While some helped me, none cured me. Finally I read/the "Golden Monitor," edited by Drs. Kennedy and Kergan and as I had heard of them as physicans ever since I was a boy, I decided to consist them. The interview satisfied me they understood their business, so I commenced the New Method Treatment. For the first month the improvement was slow and I thought I was up against it again. I decided, however, to continue a second month to give them a fair trial. Then the treatment commenced to act. I could feel the vital influence thrill through me day after day. In four months I was a better man mentally, physically and vitally than I had ever been. Two years afterward I married and am as happy as a bug in a rug. I recommend the New Method Treatment with all my heart and soul."
