WELL KNOWN VIOLINIST

Traveled Extensively Throughout the Provinces - Interesting Statements Concerning His Experience.

STELLARTON, N.S .- James B. Murray, a well known violinist, of this place, who has traveled extensively throughout the Provinces, makes this statement:

"I was running down in health and my weight fell off from 175 to 150 pounds. Prescriptions did me but little good. My trouble was called nervous dyspepsis. I resorted to Hood's Sarsaparilla and after taking five bottles I was greatly benefited. I feel as well now as ever in my life, and have increased in flesh so that I now weigh 177 pounds. I am well known in this part of the country, having followed my profession, that of a violin musician for the last 26 years. I gladly tell my friends what Hood's Sarsaparilla has done for me. Before I began taking the medicine I did not have any ambition, but now all is changed and my dyspeptic trouble perfectly cured." JAMES R. MURRAY.

N. B. If you decide to take Hood's Sarsaparilla, do not be induced to buy any substitute. Be sure to get Hood's.

Hood's Pills are the only pills to take with Hood's Sarsaparilla.

The Cork Driven

Process.

Plucky Attempt of the Americans to Shut Up Cervera.

The Spaniards Dynamite the Sunken Collier-All the Cables Connecting Cuba With the Outside World Cut.

THE CORK DRIVEN IN. Washington, June 4 .- "The cork is driven in the bottle" was the comment of the naval officials at the navy department this morning upon the news forces. of the sinking of the collier Merrimac in the channel at the entrance of Santiago harbor. They are absolutely satisfied that the ship was sent in by design of Sampson to close the channel and prevent the escape of the Spanish squadron, and that the undertaking was successful. If so, this will rank as one of the boldest achievements in naval history. It is not possible now to learn who made up this crew, but the opinion at the navy state dairy, 121/2c to 151/2c; creamery, department is that Admiral Sampson 131/2c to 161/2c. Cheese easy; large state directed that no man be ordered into white, 6%c; fancy small white, 6%c to such dangerous duty, but that volun-

One of the reasons that form the basis of the conviction that the Merrimae was purposely sunk in the channel is the fact that the ship was of little value as a naval vessel. She had IROQUOIS, Ont., June 3. - At the broken down in her machinery, and cheese board today 995 boxes were offer- was kept at work only with difficulty. She is just the kind of craft that would be selected to block up the channel. Against President Hereaux.

Cape Haytien, Hayti, June 4 .- It appears established beyond a doubt that the reports of an uprising in the repubof San Domingo against the power of President Hereaux are correct. initial blow was struck at Monte Christi on the borders of Hayti, the neares Dominican port to Cape Hayti. The preparations for the revolution are said to have been very elaborate, and there is a strong belief that the revolutionists are sure of success. The

Dominican consul here says he has a report that the revolutionists have been defeated at Monte Cristi. The report is not generally believed. Gen. Garcia, an important Dominican leader, is said to be taking part in the revolution, and it is reported that there will be a rising at Santa Domingo, the capital of the Dominican Republic.

About two months ago Gen. Jimenz left Cape Haytien, ostensibly in and about Cuba will soon give a decisive turn to the course of the war. It said, he did not go any further than looks for either a landing and defeat of New York, and it is believed that while the Americans-this is confidently in the city he perfected arrangements counted upon-or a signal reverse to for a revolution in San Domingo, over the Spanish troops or Admiral Cervera's which, if successful, the great majorsquadron, which will make it easier for ity of the Dominicans, for the time being, at least, will rejoice. Gen Jimenz is 55 years of age. He and Porto Rico-while waiting for the has refused several times to be a candidate for the presidency of San Domingo. His father was formerly president

commands the Puritan," continued the order of the day, and the discussion of the budget was resumed. Senor Casward in the front rank of the pioneers. Ward in the front rank of the pioneers. of the budget was resumed. Senor Castelar, who is now at Alciente, has declared to an interviewer that he will clared to an interviewer that he will the meaning of the pioneers. He entered the navy as a midshipman in September, 1841, and passed through the service of the service to the mean to blaze the distribution of the mean to blaze the distribution of the pioneers. Ship he was ever on, and in my opinion she is the finest fighting machine affoat. Frank Wise told me when he not come to Madrid to defend himself, the successive grades of the service to took the Amphitrite down to Charlesarticle does not attack the queen re- the night of Nov. 17, 1861, he began his year, he had a twenty-hour storm with permitted under absolute monarchs. man on the needs of the United States yet there was never a minute, he said, as ugly a cross-cut sea as he ever saw, when, if it had been necessary, he couldn't have fought all his guns ef-

fectively.' THE MONTEREY'S MARVELOUS RECORD.

"I could quote authorities, as I said before, on the sea-going qualities of the monitors and their surpassing qualities as steady gun platforms, all night," said the admiral, "but Kempff is enough. What Kempff? Why, Louis. He commanded the Monterey, and went out from San Francisco in it in search of a storm to try her sea qualities in. He was in two severe storms about as bad as were ever known on the Pacific, and there was not a minute, so he reported to the navy department, that he couldn't have fought his guns with ease, or a point of the compass where the guns couldn't have been directed. "Kempff took the Monterey up to the mouth of the Columbia River," he continued. "There had been a heavy

storm, and a large merchant steamer had been trying to get out for two days. The seas appalled her They were so high that Kempff couldn't see the channel buoy, but he got a land mark and ran the Monterey in. He Universal reputation. Ask for them at has assured me that when he got on the bar the seas rolled on top and over the Monterey, and that one-third of the vessel from the after turret was eight feet under water. Any other vesel in the world but a monitor would have been sunk. Why didn't the Monterey sink? Because a monitor is hermetically sealed, and can no more be sunk than a cork bottle half-full of water can be when thrown over-"We want more monitors," said Fighting Jim, in conclusion. "They can go anywhere and whip anything affoat. And they are never out of date as long as they are afloat. And we want torpedo boats-big ones, of the destroy-
