The Presbytery in connexion with the Church of Scotland are moving briskly in the matter of the proposed Kirk. Hon. Mr. Conwell has most liberally made them a present of a lot for a site. This lot is on the south side of Orange Street, not far from the Orange Hall. Wm. Lindsay, Esq., M. P., made a similar offer of a lot between the Mechanics Institute and the Honiton Road; but his kind offer was declined, we believe on account of the other lot being more conveniently situated. A plan and specification are in course of preparation and the members of the congregation seem to be sanguine of success. [Woodstock Acadian.]

The Yankees intimate that they are negotiating for the purchase of British America, and intend to annex Mexico. They are a fast people. Is there any other slice of territory they would like to have? [Telegraph.—Yes Great Britain and all the rest of Europe!—Standard.]

The Halifax papers say that it is the intention of the English Railway Company to commence operations on the Windsor end of the line about the first of May. The landing pier at Annapolis will be contracted for forthwith, and completed during the present year.

It is becoming very doubtful whether Suratt will be tried at the present term of the court. It is said Attorney General Stanbury is not prepared to proceed to trial yet, and is anxious for a postponement till the next term. It is even rumored that grave doubts are entertained as to whether there is a sufficiency of legal evidence on which he is accused.

THOSE BEAVERS.—A Boston paper says the spring style of gentlemen's hats leads to the inquiry whether some of the youngsters

haven't been brushing up their grandfather's old beavers.

—The Boston Transcript mentions the fact that a firm in that city have put up and shipped to the noted house of Crosse & Blackwell, 240,000 cans of lobsters during the present season. This is brother Jonathan feeding John Bull with the rich products of the sea.

—The Lewiston Journal deprecates the "playing of marbles" by boys, as it leads to gambling. "People of the Journals" order of morality, are almost too good to live in this wicked sphere.

—Wisconsin is a reading State. It supports one hundred and thirty three newspapers.

It is stated that Secretary Seward has already proposed a plan to divide Russian America in six Territories.

—A country paper speaks of a man "who died without the aid of a physician." Such instances are very rare.

—Dickens is really coming to this country towards the close of the summer months, and will remain five or six months, giving public readings in the principal cities.

—It is estimated that there are \$2,600,000 of counterfeit money in circulation in the States. We have reason to believe that fully one third of the scrip in circulation in this vicinity is counterfeit.

## The Standard.

ST. ANDREWS, APRIL 24, 1867.

INTERCOLONIAL RAILWAY.—During the past week we have received a most important paper, entitled "A brief Review of the Reports made upon the Exploratory Surveys for the Intercolonial Railway, and for the Extension of the New Brunswick and Canada Railway from the present Terminus at Richmond to the Canadian Frontier, together with a statement of Comparative Distances and Estimates," by W. M. HOCK, C. E.

This document is carefully drawn up with reviewer's usual ability, and contains a large amount of information within a small compass from reliable data, and shows at a glance by tabular facts, and tabular figures, that the Frontier route can be constructed for one million pounds sterling less cost, than either the Central or North Shore routes. Indeed, the figures presented by Mr. Hock, make it apparent, that it will be the interest of Canada and New Brunswick to adopt the frontier route, (that as Nova Scotia being common to any adopted to the connection or intersection with the European & North American Railway at St. John, Antigonish or Moncton), as being the most direct, presenting less engineering difficulties, and passing through a fertile tract of country with numerous settlements.

More especially it will take in eighty two miles of Western Extension Railway and about ninety six miles of the E. & N. A. Railway; by any other route this cannot occur, and the City of Saint John would be left out in the cold to the great satisfaction of Halifax.

That it will therefore be of the greatest importance to the commercial emporium of this Province, must be admitted, and St. John will surely advocate and support the route, as no doubt the up river counties will, it would be civic suicide and produce commercial despair to do otherwise; therefore let the St. John Press speak determinedly, and tell it out among the people. Besides the guarantee of the British Government is for £3,000,000 sterling, an amount sufficient to build the Frontier line from River da Loup to Truro, whereas should either the Central or North Shore routes be selected the Government of the New Dominion will be obliged to go into the Market and raise another million sterling.

When these facts become known to the Imperial Government and the Cabinet at Ottawa, it will not require a prophet even in his own country to divine that which will be eventually adopted, viz, the Frontier route.

Twelve months ago last Thursday, there was considerable stir in this place. On that day (17th April), H. M. S. Duncan, Admiral Sir James Hope, with the 2nd Battalion 17th Regt., a company of Engineers and Battery of Royal Artillery, under command of Maj. Gen. Doyle, arrived at Joe's Point. The following day the troops landed and proceeded by the Band marched into Town, amid loud cheers from the populace, who had been for some time threatened with a Fenian raid; but thanks to the foresight of Col. Anderson, through whose instrumentality the troops were ordered here, the Fenians were deterred from carrying out their purpose. H. M. S. Rosario and Fawn were also anchored at Joe's Point, and a strict watch was kept night and day;—what a change a few months bring. We trust no occasion will occur to call for such defensive measures, although the presence of troops makes everything lively.

The Hon. the Surveyor General was here last week—looked well and was in good spirits. The visits of our rulers are of such rare occurrence, that one would almost suppose the Town was not a portion of the Province, but the

time is fast approaching when it will receive more attention from them.

The deep sea wharf at St. Andrews is under contract to Mr. Aymar and progressing well. Its location is just within the Light House. [St. Croix Courier.]

The above is correct except in one most important particular, the wharf is not a "deep sea wharf," but intended principally for the river steamer.

It has been shown not only by the Admiralty chart, but more recently by actual Survey, that the only locality for a deep sea wharf is at Joe's Point, where the Admiral's ship, and other War vessels anchored last year, and where H. M. S. "Cordelia" is at present anchored; and we understand that orders have been issued, directing any of H. M. Ships that may visit this Port to proceed directly to the Western ballast ground at Joe's Point, from its being easy of access, the deepest water, and affording the best anchorage.

The fact is that if we expect the Canada trade at this Port, we must follow the example set by other Ports, and provide "suitable wharf accommodation for vessels of the largest class, affording every facility for discharging steamers rapidly." Commendable foresight in this matter, will secure a trade which we cannot hope to possess without "suitable wharf accommodation."

Since the above was written we are happy to state, that a notice was received (which may be seen in another column) intimating that an application will be made at the approaching Session of the Legislature, for the passage of an Act to incorporate a company to build a Deep Sea Wharf, at Joe's Point, and a Line of Railway, therefrom to the N. B. & C. Railway. This is a move in the right direction, and one that will be hailed by all well wishers of the Port, with hearty good wishes. The time has arrived, when we all must put our shoulders to the wheel and push on the good work; the tide is at its flood—let us then take warning, and work with a will.—UNITED-LY. Delay now, would be dangerous to the best interests of our Town, but we must know no such word as fail.

Town Hall.

It appears that the "good time is coming" at last. It appears that "good things" like "misfortunes," never come singly. From a notice in our columns we learn that an application will be made at the next Session of the Legislature for the passage of an Act to authorize the Justices of the Peace to contract a loan for the purpose of building a Town Hall in this place. We have heretofore written so much on the necessity of having a Deep Sea Wharf, and a large Town Hall, that we now only add, we will do all in our power to promote both.

We commence in our present issue the publication of the Orders passed at April Sessions and will give the remainder in our next and following numbers. The License question which we alluded to briefly in our last edition, was settled by granting Tavern Licenses to the applicants, who we learn were all qualified and who appear to be men of means.

We have received a note from Mr. John Murphy, Policeman, St. Stephen, requesting us to state, that the John Murphy mentioned in the Grand Jury Report published in last week's edition, belongs to Calais and is known as John B. Murphy. We have complied with his request, and at the same time inform him that no one supposed he was the person named in the Report.

The weather still continues cold and wet, retarding farming operations. On Monday night the rain poured down in torrents accompanied by a strong south westerly gale. The roads are reported to be in bad condition rendering travelling very difficult.

The Legislature is summoned to meet for the despatch of business on the 11th of May.

The St. Lawrence is nearly clear of ice, and vessels are being loaded for the Maritime ports.

John G. Myers formerly a contractor on our Railway, was beaten so terribly in a drinking saloon, in New York that he died.
