

## V

- Vapour of carbon, 2.  
Vaporized substances, in electric furnace, 2, 5, 8, 12, 147, 157-170, 192.  
Vickers, Sons' and Maxim, electric steel furnace, 99.  
Violle, temperature of electric arc, 53.  
Volta, discovery of electric battery, 1.  
Voltage, of arc, 67.  
    arc furnaces, 67-69.  
    electric furnaces, 66-71, (see also individual furnaces).  
    electric supply, 18.  
    resistance furnaces, 69-71, (see also individual furnaces).  
    smelting furnaces, 69-71, (see also individual furnaces).  
Voltmeter, 16.  
Volts, 16.

## W

- Waidner, C. L., methods of pyrometry, 82, 83.  
Waldo, Dr. Leonard, production of electric furnace steel, 96.  
Walls of electric furnace, 21, (see also individual furnaces).  
Wanner, optical pyrometer, 83.  
Water-cooling, electrodes, 4, 5, 59, 60, 80, 81, 87, 105, 130, 173.  
    furnaces, 29, 57, 58-60, 94, 97, 161, 167.  
Water-gas, 43.  
Water-powers, 14, 189, 190, 191.  
Watts, 48, 60-66, 73, (see individual furnaces).  
Waves, electric power from, 194.  
Webber, R. F., melting temperatures of fire-clays, 49.  
Weckbecker, J., electric-furnace graphite from charcoal, 144.  
Welland, Ontario, electric iron-smelting at, 14, 107, 120.  
Wellman, tilting open-hearth furnace, 69, 86, 90.  
Westphalia, Gin steel furnace in, 106.  
Wheeler, H. A., melting temperatures of fire-clays, 49.  
White-coal, 189.  
Wilbur mine, electric smelting of ore from, 126.  
Willson Aluminium Company, production of ferro-chromium, 138.  
Willson, T. L., calcium carbide furnace, 9-10, 20, 53, 59, 155.  
Wilson-Macaulen Company, articles of electro-quartz, 172.  
Wood, (fuel), 43.  
Wright, J., "Electric furnaces and their industrial applications," 15,  
    25, 53, 173, 174.  
Wrought-iron, 40, 85.

## Z

- Zinc, 40.  
    electric furnaces, 30-31, 155-170, (see Cowles, Johnson, Laval,  
        Reynolds, Salgues, Stansfield, Snyder.  
    electro-thermic production of, 155-170.  
    Extraction Company, American, 165.
