This is not an historical novel in any sense of the word. It is a fascinating romance with Aaron Burr as the central figure. The author makes of Aaron Burr an American musketeer—a sort of United States Don Caesar—who rules our country as President-General. He leads a mighty army through conquering wars, taking valuable possessions from the British, Spanish and French. Everything he undertakes is for love of country. He is the people's idol. A love adventure is of the same importance to him as an affair of state, and he slights neither.

It is simply the author's fanciful idea of "what might have been" if Burr had not shot Hamilton.
