

INTRODUCTION.

WE take this opportunity to express to our friends and customers our sincere thanks for the very liberal patronage they have bestowed on us for the last twenty-five years. During this period we have been engaged in manufacturing Machine Tools and Wood Working Machinery, and constantly adding to and improving our machines to meet the new and increasing wants of the public. It has been our aim and ambition, as the pioneers of this branch of business in Canada, ever to stand foremost among the numerous competitors for public favor and patronage. How we have succeeded in accomplishing this is not for us to say; we leave it to the judgment of a public which we have ever found fully appreciative of our endeavors to meet the demands of the trade. With our long experience and our practical personal knowledge of the business, added to the fact that we have always in our employ talent second to none in the country, constantly engaged in perfecting and improving the different machines, we can with confidence recommend our goods as complete in every respect, and unsurpassed either in improvements or workmanship. We are bold to make this statement, strengthened as we are, and always have been, by the testimony of some of the most practical men in the country.

Every machine we build is what it is represented to be. Each machine is put together and tested on the work it is designed to do before leaving the shop, thus giving us the best evidence, that of actual use, that it is perfect.

We use none but the best of material in the construction of our machinery; the Castings are made of Scotch and Canadian Pig Iron, which insures strength and durability, and all fast running spindles are made of the best English Steel.
