

# PATERSON'S

## Wire-Edged

## Ready Roofing

### Easy to Put On

### Hard to Wear Out

Aptly describes two of the many advantages possessed by Paterson's Wire-Edged Ready Roofing, the only popular substitute for Shingles.

A shows method of laying Red Star Brand Wire-Edged Ready Roofing, with 2-inch laps secured by nailing two inches apart. BE shows wires running through the edges of the roofing, giving it great strength at the joints or laps—a very desirable feature, especially in localities where high winds prevail.

We offer you a durable fireproof roofing material for less money than you would pay for the poorest quality of shingles.

Wire-edged Ready Roofing is made in Canada by a responsible Canadian company, who stake their business reputation on the quality of the material they manufacture. For over 20 years our roofing has successfully stood the severe test of the variable climate of Canada, and our annual sales are now over 100,000 rolls. The great increase is chiefly from sections where our roofing has been used, showing clearly satisfaction.

You can buy our Wire-Edged Ready Roofing and other Goods from almost any hardware merchant in the Dominion.

#### Something Unique.

At the Canadian National Exhibition the Grignon Manufacturing Co. of Montreal, show an up-to-date sugar bush in miniature that visitors should not miss seeing. A typical Vermont sugar grove is pictured. The exhibit will be shown at all the leading fairs.
