

Works as Hard as a Horse

"A good dairy cow in full flow of milk is expending as much energy as a horse at hard labor, and this without cessation for many months."

The above quotation is taken from the book "Feeds and Feeding," by W. A. Hendry, D.Sc., D.Agr., which is used as a text book in the Agricultural Colleges.

When a horse works hard he requires more concentrates and less roughage. This is also true of a cow. More than that, the concentrates should be chopped, ground or crushed

to make the feed easy of mastication and digestion, so as not to overtax her digestive organs.

Monarch Dairy Feed is a well-balanced, concentrated, completely mixed and prepared feed that is palatable and easily digested. It is a feed that gives energy and stamina to the cow and is so highly digestible that, after the bodily needs of the cow are provided for, there is a large percentage remaining to turn into milk.

Monarch Dairy Feed is rich in Proteins, analysing 20% Protein and 4% Fat.

"The Plug with the Hotter Spark"

The ball point of the "M & S" plug creates a larger and hotter spark, causing more complete combustion. This hot spark will give your car new life and more power.

The three-in-one terminal is adapted to any style ignition wiring. The high grade chemically glazed porcelains are interchangeable—one porcelain fits all plugs.

Dealers—The "M & S" plug is standard equipment on the new Overland "4". Ask your jobber for them.
