Home.

BY RIPLEY BARTLETT. Our native land just out of sight, Before us spreads the boundless sea, When hopes of distant lands are bright. The dearest thought will ever be. We're nearer home.

Amid the joys of foreign shores, New friends, new pleasures, scenes and love, Most cherished thought, time does not pause: The strains of pleasure far above,

Again a voyager on the sea, O'er maddened wave, o'er shricking wind, There rings the echo merrily, And waves of joy sweep o'er our mind, We're nearer home.

So when we launch our hope in youth, And when in manhood's strength and pride, We steer our bark toward perfect truth. And safely o'er life's trials ride-And when we turn our steps in age Pass through the gloomy sea of years, Calaly we see life's fierce storms rage, And the dear thought soothes all our fears. We're nearer home.

The Story of the Thellusson Will.

It is now sixty-two years since Peter Thellusson took stock of his worldly possessions, and found that he had £600,000 in money, and land of the annual value of £4.500. Peter Thellusson bad satisfied the ordinary ambition of an English bourgeois -he had founded a family. Peter Isaac, the son of his youth and the prop of his house, was heir to £35,000 a-year in money and land, and might claim to be a born gentleman. Peers and peeresses might hereafter spring in intermediate succession from the loins of that denizen of a dingy little back parlour behind the Bank The best men upon 'Change envied the rich and prosperous Reter Thellusson, who had no object of ambitton unsatisfied. Peter was of a different mind; he had not nearly object of smbthom unsatisfied. Per was of a different mind; he had not nearly of a different mind; he had not nearly money enough. > DO RIGHT, THOUGH YOU HAVE ENEMIES. -We saree with the editor of the Nash.

The following remedies are offered to the public as the best, most perfect, which medical science can afford. ATEN'S CATHARTIC PILLS have been prepared with the utmost skill which the medical profession of this age possesses, and their effects show they have virtues which surpass any combination of medicines hitherto known. Other preparations do more or less good; but this cures such danger, our complaints, so quick and so surely, as to prove an efficacy and a power to uproot disease beyond any thing which men have known before. By removing the obstructions of the internal organs and stimulating them into healthy action, they renovate the fountains of life and vigor, — health courses stimulating them into healthy action, they renovate
the fountains of life and vigor, — health courses
anew through the body, and the sick man is well
again. They are adapted to disease, and disease
only, for when taken by one in health they produce
but little effect. This is the perfection of medicine.
It is antagonistic to disease, and no more. Tender
children may take them with impunity. If they
are sick they will cure them, if they are well they
will do them no harm. Give them to some patient who has been pros-trated with bilious complaint: see his bent-up, tot-tering form straighten with strength again; see his long-lost appetite return; see his clammy features blossom into health. Give them to some sufferer whose foul blood has burst out in serofula till his skin is covered with some subout with every potion which ingenuity could sugsee the scabs fall from his body; see the new, fair skin that has grown under them; see the late leper can reach; but mark, he walks with crutches now and now he walks alone; they have cured him

can reach; but mark, he walks with crutches now, and now he walks alone; they have cured him. Give them to the lean, sour, haggard dyspeptic, whose gnawing stomach has long ago eaten every smile from his face and every muscle from his body. See his appetite return, and with it his health; see the new man. See her that was radiant with health and loveliness blasted and too early withering away; want of exercise or mental anguish, or some lurking disease, has deranged the internal organs of digestion, assimilation or secretion, till they do their office ill. Her blood is vitiated, her health is gone. Give her these PILLS to stimulate the vital principle into renewed vigor, to cast out the obstructions, and infuse a new vitality into the blood. Now look again — the roses blossom on her cheek, and where lately sorrow sat joy bursts from every feature. See the sweet infant wasted with worms. Its wan, siekly features tell you without disguise, and painfully distinct, that they are eating its life away. Its pinched-up nose and ears, and restless sleepings, tell the dreadful truth in language which every mother knows. Give it the PILLs in large doses to sweep these vile parasites from the body. Now turn again and see the ruddy bloom of childhood. Is it nothing to do these things? Nay, are they not the marvel of this age? And yet they are done around you every day.

Now turn again and see the ruddy bloom of childhood. Is it nothing to do these things? Nay, are they not the marvel of this age? And yet they are they not the marvel of this age? And yet they are they not the marvel of this age? And yet they are they not the marvel of this age? And yet they are they not the marvel of this age? And yet they are they not the serious symptoms of these distempers, they are the easier cured. Jaundice, Costiveness, Headache, Sideache, Heartburn, Foul Stomach, Nausea, Pain in the Bowels, Flatuleney, Loss of Appetite, King's Evil, Neuralgia, Gout, and kindred complaints all arise from the derangements which these Pills rapidly cure. Take them perseveringly, and under the counsel of a good Physician if you can; if not, take them judiciously by such advice as we give you, and the distressing, dangerous diseases they cure, which afflict so many millions of the human race, are cast out like the devils of old—they must burrow in the brutes and in the sea. Price 25 cents per box —5 boxes for \$1.

Through a trial of many years and through every nation of civilized men, Ayer's Cherry Pectoral. has been found to afford more relief and to cure more cases of pulmonary disease than any other remedy known to mankind. Cases of apparently settled consumption have been cured by it, and thousands of sufferers who were deemed beyond the reach of human aid have been restored to their friends and usefulness, to sound health and the enjoyments of life, by this all-powerful antidote to diseases of the lungs and throat. Here a cold had settled on the lungs. The dry, hacking cough, the glassy eye, and the pale, thin features of him who was lately lusty and strong, whisper to all but him Consumption. He tries every thing; but the disease is gnawing at his vitals, and shows its fatal symptoms more and more over all his frame. He is taking the Cherry Pectoral how; it has stopped his cough and made his breathing easy; his sleep is sound at night; his appetite returns, and with it his strength. The dart which pier
