"Well, anything new lately?" enquired the just arrived washing machine agent, as he hopped onto the porch of the Skeedee tavern.

"Well, no, not worth mentioning, I guess," replied the landlord. "Things is kinda slow just now, and—but, ho! Come to think, three people were hit by a pet squirrel last week, and considerable fear is expressed that they may go nutty."—Puck.

Get the Best Out of Life HEALTH AND SUCCESS

By keeping vigor and vitality at the top notch—**DR. CHASE'S NERVE FOOD** will help you.

Health, strength, beauty, success. These are the words which tell of a happy, joyous life.

The foundation of each and all is good, red blood.

Red blood on which health can build—red blood from which muscles and nerve cells are created—red blood which rounds out the form and gives the healthful glow of the complexion—red blood from which comes energy and vigor of mind and body.

With red blood there is no weakness and disease, no failure and fatigue. Red blood makes life worth living and only when it is present in the system can you get the best out of life.

Dr. Chase's Nerve Food has proven an enormous success because it forms new, red blood, from which new nerve and brain cells are created.

When you use Dr. Chase's Nerve Food you know for a certainty that each dose is doing you a certain amount of good because it adds just so much new red blood to the system.

Whether you have become exhausted by disease, overwork or the depressing effects of spring matters not. The cure is found in the use of Dr. Chase's Nerve Food.

Irritability, sleeplessness, indigestion, nervous headache, anaemia, despondency and all the dreaded accompaniments of a weak and exhausted system disappear when this great blood-forming, system builder is used.

To get the best out of life you must use Dr. Chase's Nerve Food to make you well and to fill you with the energy and vigor which makes for success and happiness. 50 cts. a box, at all dealers, or Edmanson, Bates & Co., Toronto.

REMOVING WARTS

What will remove warts from cattle?
J. S. C.
Alta.

Ans.—If the warts have a slim base, they may be clipped off with scissors or shears, and the wound touched with a potash pencil or stick, which may be had from your druggist. They may be taken off by tying a silk thread or a horse hair tightly around them. If the warts have a strong, broad base, touch them daily with potash caustic until burnt out.

CHEAP PAINT

Give recipe for making a lime paint for barns or fences, a paint that will stick well and protect the material to which it is applied?
H. McD.

Man.
Ans.—To one-half bushel of un-slacked lime add sufficient boiling water to slack it, then cover to keep in the steam. Then prepare, one peck of salt, previously dissolved in warm water, two lbs. glue dissolved in 7 lbs. of water, and when dissolved add 6 ozs. of bichromate of potash and one-half pound of whitening; add this to the lime, stir, strain and apply hot, either with brush or spray pump.

Another good fence and barn lime paint is made as follows: Lime, 1/2 bushel; hydraulic cement, 3 pecks; umber and ochre, each 10 lbs.; venetian red, 1 lb.; lamp black, 1 lb. Slake the lime; shake up the lamp black with a little vinegar; mix well together; add the cement, and fill the barrel with water. Let it stand several hours; stir frequently. A larger proportion of ochre gives a darker color. Use only one coat. This is said to look well after five years' use.

AGE OF CATTLE

Is there any rule for determining the age of cattle other than by the rings on the horn after they have reached a certain age? Can their age not be determined by the teeth as in horses, sheep, and other animals?
R. M. B.

Sask.
Ans.—At the Chicago Stock-yards the following is adopted as a basis for determining the age of cattle:

Twelve months.—An animal of this age shall have all of its milk (calf) incisor teeth in place.

Fifteen months.—At this age, center pair of incisor milk teeth may be replaced by center pair of permanent incisor (pinchers), the latter teeth being through the gums but not yet in wear.

Eighteen months.—The middle pair of permanent incisors at this age should be fully up in wear, but next pair (first intermediate) not yet cut through gums.

Twenty-four months.—The mouth at this age will show two middle permanent (broad) incisors fully up and in wear, and next pair (first intermediate) well up but not in wear.

Thirty months.—The mouth at this age may show six broad permanent incisors, the middle of the first intermediate pairs fully up and in wear and the next pair (second intermediate) well up but not in wear.

Thirty-six months.—Three pairs of broad teeth should be fully up and in wear, and the corner milk teeth may be shed or shedding with the corner permanent teeth just appearing through the gums.

Thirty-nine months.—Three pairs of broad teeth will be fully up and in wear, and the corner teeth (incisors) through gums but not in wear.

DEFORMED FOOT FROM BARB WIRE CUT

Three-year-old filly was cut badly with barbed wire on the inside of the fore foot at the coronet band. After the cut healed, mare was not lame, but she is becoming lame, apparently from the frog of the foot being contracted. Can you suggest treatment and remedy that may be applied to the hoof to make it grow straight and even?
L. R.
Alta

MINERAL SURFACE - NEEDS NO PAINTING

A MATITE roofs need no painting. The owner need never look at them; they take care of themselves. They are "no-trouble" roofs. They present to the weather a real mineral surface against which storm and wind and snow are absolutely powerless. This surface does not require constant painting like the smooth surfaced or so-called "rubber" roofings. The mineral surface is far better than paint.

Of course before Amatite came, the "smooth surfaced" roofings were the best kind to buy. Now that Amatite has been invented and thoroughly tested by years of use, painting a roof is wasteful and unnecessary. The cost of painting a "rubber" roofing from year to year will soon cost more than the roof itself. That is why everybody who knows about roofing is buying Amatite nowadays. It needs no painting.

Amatite is easy to lay. Anyone can do the work. Large headed nails and liquid cement come free with every roll.

We shall take pleasure in sending you a sample of Amatite with our compliments upon request.
