ed Batates Act--Irel

The Berl of Grammatt said the Act of last year was plander of the most inflamous description; and if this system of sanfasation was allowed to go on in Iseland, the people of Ireland would meet in Bubbin and redress their grievanous themselves. (Hear, hart, J. Is was not right that the property of Ireland all still be confinented merely to uphois some theory of the Manchaster school. There were not twenty pursous in that home when that Act passed, and he said that both Houses were graded and discraced so long as they suffered, it to canalis on the statute book. He would attempt to obtain the repeal in a thousand shapes every week if he could, 'Hear, hear,' lin some innances is states had shed for one and a half year's purchase, and its some for a high an fourteets year's purchase. He would admit that head rents had freight divid houses' had been sold was from eight to sine year's purchase. He would admit that head rents had freight from tomorphic commission, in a most indignant tone and with animated gestures— We are disgusted with the Manchaster theories and we will not have them tried. We dely you to carry on this Hill; if you do not, you will have every large these relief in the province of the little of what you will deserve it. Hear, hear; Charlen I, and James 11, tout their throines for the half of what you are doing every day. Lord Bindfird's case is nothing to be compared to the villany experted every home in that commany on this swindle.

Grand Costume Concert. Mr. and Madame Leati's Concert, on Wedn ay evening, afforded much gratification to all who had the good fortune to be present. The selection was happily chosen, being a collection of Eng-lish, Irish, Scotch, and Italian Songs, Duetts, and lish, Irish, Scotch, and Italian Songs; Duetts, and Ballads. In each particular selection these highly accomplished Vocalists were successful in render-

The Hay harvest has commenced pretty generally throughout Lower Canada,—the crop is unusually abundant, and thus far the weather has been peculiarly favorable to the agriculturist.

We have been requested to state, for the information of the Members of the Congregation, that Privity Church, St. Paul Street, which had been closed for two Sundays, in consequence of undergoing repairs and cleansing, was re-opened on last Sunday; and that the hours of Divine Service are 11, A.M., and 7, P.M. As a sign of the times, the partial defection of Megars. Richards and Smith, of Durham, are not unworthy of notice. Last night Mr. Richards are pressed his disgust at the trick resorted to be the inspector General, in Committee of the whole, in faxing the salary of the Chief Superintendent of Education for U. C. Madame Leati possesses an extremely awast and highly cultivated voice, with a very fair compass, and by no means deficient in power: her shake is well-defined, and her cadences artistically and gracefully executed. Mr. Leati's voice is a Baritone, of good quality and compass, evidently cultivated in the hest school.

That favorite Scotch Song, "Comin' through the Rye," sang by Madame Leati, elicited a rapturous encore; but we considered the "Mad Scene" the gens of the avening. Madame L appeared to have reserved her powers for this last effort, depicting, with great truth, the varied emotions of joy and grief, and proved herself an Artiste of the first quality.

Matters on the Pacific Side. Since the sailing of the steamer Isthmus, on the 15th instant, the operation of the Foreign Miner's Tax has elicited considerable public attention. In the Southern mines the greatest body of foreigners are to be found; and in the vicinity of the Sonoriam Camp they number many thousands, the proportion to Americans alone being more than five to one. On Sunday, the 17th instant, they held a large meeting at Sonora, and peased Resolutions to resist the payment of the Tax. They posted inflammatory placards, in dérision of the American population, and seemed to court what came in the sequel. Since the sailing of the steamer Isthmus, on the

Americans assembled in force, and annoneed themselves ready to sustain the authori-ties of the State. Two Americans were previous-ly killed, while in the discharge of official duty ly killed, while in the discharge of official duty among the foreign population. About five hundred men assembled at the town of Sonora from that neighborhood; while the people at 'ullivan's diggings, and at Wood's, also prepared for the emergency. The turbulence of the foreigners soon received a check in a manner that will have a lasting effect upon them. Among the first demonstrations, while the sheriff was in the act of arresting a disturber of the peace, he received a slight stab in the back; this was seen by an American present, who cleft the perpetrator on the spot.

The foreigners will have to be subservient to the law of the State concerning mining regulations.
