METHOD OF STUDY.

The great trouble with many tudents is that although they read a great deal they do not reember any of it. They put a book aside and it is soon forgotten. Our minds are like a sieve. Whereas if we read with pen in hand, and made summaries or took notes on what we read, our minds would soon become gestive and valuable thoughts which we could utilize in time of

We should also have an index for what we read. Later on in life if we are called upon to prepare a speech or to write an article on short notice, it is necessary to know what the sources are and where to find them: we keep an index of what we have read, we can turn imme diately and find out where we read about the question. Perhaps we may find that our note books contain something about the subject. At any rate we will be ready men and prepared to get time. Mr. P. M. Phelps, Stanbridge East, Que., writes:—"I have been taking Milburn's Laxa-Liver Pills with such good results I thought I would write you.
