Alkali in Shampoos

If you want to keep your hair dook ing its best, be careful what you wash with. Don't use prepared shampoos or anything else that contains too much alkali. This dries the scalp, makes the hair brittle and ruins it.

The best thing for steady use is just ordinary mulsified cocoanut oil (which is pure and greaseless), and is better than anything else you can use.

One or two teaspoonfuls will cleanse the hair and scalp thoroughly. Simply moisten the hair with water and rub it in. It makes an abundance of rich, creamy lather, which rinses out easily, removing every particle of dust, dirt, dandruff and excessive oil.
