

THE WORK OF SINNERS MEN.

The local government are certainly entitled to the credit of having succeeded in passing the anti-Chinese act which has passed through the legislature at Ottawa without having been disapproved. It is not as sweeping a measure as the province had a right to expect or that it would have obtained the sanction of the Dominion government...

THE NORTHWEST.

A battle in the Northwest is imminent. Gen. Middleton has planned his campaign on the basis of four points, viz: Clark's Crossing, Eastlinton, Edinboro and the mouth of the Saskatchewan and driving them to a common center, and then attacking them in a decisive battle...

The Advance of Arcturus.

There will be a fine show for posterity to do if the present doings of the star Arcturus undergo no change. The result of the observations made during 1887, numbering 500 and extending over a period of 100 years, shows that the star is moving toward the earth, down at the rate of some 20 miles a day, or 1,800 miles a year...

Frightened into Lunacy.

The case of Miss Ann Hayes, of Coburn, of whom mention was made in the Journal yesterday, as being so violent at Ulster while being confined in the lunatic asylum is one of unusual interest. Miss Hayes a few years ago was a young lady of high character, merry disposition and a society favorite...

A Suicide and Its Sequel.

BREILY, April 28.—The sequel to a sensational story of the past has been the appearance in a birth notice copied into the morning paper. Two years ago Professor von Feltner, who had recently married a daughter of Count Flemming, shot himself, and left a letter saying that he was the victim of an "insane delusion," in which lots are drawn and the winner one has to kill himself. His opponent, he stated, was a young man named von Feltner, an anti-Semitic feeling was very strong at the time, and every effort was made to find the members along the North Shore railway in Quebec a letter which established the criminal intimacy of the young man with Legation Counselor von Heyking, one of her husband's most intimate friends. This case is a French-Belgian case, and Heyking was requested to send in his resignation. This he did, and he and the widow were both expelled from society. The following newspaper announcement forms the sequel: "Here von Heyking and Countess Elizabeth, his Countess Fleming, in Florence, have been rejoined in the birth of a child."

A Run on a Drug Store.

Never was such a run made upon any drug store as now at A. J. Langley & Co. for a trial bottle of Dr. King's New Discovery for Consumption, Coughs and Colds. All persons affected with Asthma, Bronchitis, Hoarseness, Severe Coughs, or any affections of the Throat and Lungs, can get a Trial Bottle of this great remedy free, by calling at the above Drug Store. Regular size, 25c.

Mrs. WRIGHT has received a new and choice stock of millinery and ornaments.

Eastern Canada Mail.

WINNIPEG, April 29.—The Hudson's Bay Company has contributed the handsome sum of \$2500 to the fund for the relief of the families of the Winnipeg volunteers who have gone to the front. A farewell service was held in the room of Knox Church last evening, on the occasion of the pastor, Rev. Rev. D. M. Gordon's leaving the congregation tomorrow to go to the front as chaplain of Ninetieth battalion.

TORONTO, April 29.—The Mail this morning contains the charges that the Globe and its agents are supplied with news by Jackson, a member of Rial's retinue, and that the Globe has been purveying Rial's information and pandering to the purpose of treasonable men. The Hamilton Spectator says this whole affair must be sifted to the bottom. The Globe replies that those satellites have been known to exist for some time, and that the Globe has been purveying Rial's information and pandering to the purpose of treasonable men. The Hamilton Spectator says this whole affair must be sifted to the bottom.

OTTAWA, April 29.—Mr. Courtney, deputy minister of the Interior, has been appointed to the position of collector of the customs and excise for the Province of Ontario. It is estimated that there are 10,000 Chinese in the province. At \$10 a head the sum of \$100,000 will be added to the revenue, to say nothing of the fines that may be levied under the act. If the existing law is not amended, the Chinese in their opposition to the Chinese they have a queer way of demonstrating their industry. This act has lopped off the branches of the tree. The act, which was disallowed through to failure, was intended to strike at the root; but there is reason to believe that it had not been for the agitation of the members of the Ontario Times for \$50,000 damages for alleged libel. The Times republished an article from the Globe, which contained charges against the officers and men of the 68th in an interview with Sergeant Nelson.

WINDSOR, April 28.—Dr. Ferguson to-day received a telegram giving fuller particulars regarding the death of his son. The information was obtained by Mr. George Johnson, of the C. P. R. telegraph office, who was a close companion of young Ferguson, and reads as follows: "At the time Ferguson was shot, No. 1 engine was in the engagement, and very front, adjacent to 'C' company of the Toronto School of Infantry, on the right flank and in front of the battery, the hottest of the fight was. A bullet entered his left side below the heart, passing through the body and striking him almost instantaneously, his last words being 'I'm struck.' He was buried in a common trench, and the body was found in a decisive battle. Thus far the rebels have had the best of the campaign; but it is approaching the end, and the rebels must give out and when the Gatlings and cannon will play and mow them down by scores. One detail of the rebel forces will destroy Rial's position; but half-dozens of them more keenly alive to the necessity of putting down the rebels. Stirring news may be looked for very soon."

TORONTO, May 1.—The Anglican School of St. James in this city, having offered their services to the minister of militia as nurses to the sick and wounded in the Northwest, have been informed that their offer would be accepted with pleasure if more nurses were required. A small host of nurses, including Miss Newton, Holden stated to cross the river last night, has been picked up by the light house keeper at Grassy Landing. There is still no trace of Holden. Some of his friends talk of fool play, but the fact is that he is probably in the hands of a theory. It is supposed that the boat swamped and Holden drowned.

OTTAWA, April 30.—Further examination of the ravine reveals the fact of the Fish Creek fight being an ambush. The rebels were strongly entrenched, yet there was no cover upon their loss being severe. Fifty-five good horses were found dead in the ravine, also the bodies of three Indians, who were too near our lines to permit of the Indians successfully carrying them off. The result of the fight was, that the rebels, residing on Locke street South, yesterday gave her child by mistake a teaspoonful of arsenic, and she died. The child is recovering, but it is feared that the arsenic may have done some harm.

OTTAWA, April 29.—Sir Leonard Tilley is very much worse to-day, and his condition is looked upon as decidedly dangerous. His physicians say that he will not recover. He is expected to return to his duties in Parliament even should he meet rapidly enough to move out. Mr. Powell, it is understood, has signed his dates for the remainder of the session.

Last Wednesday, a young man named Armstrong of Hopworth, visited Tara, in Bruce Co., in company with two sisters named Patricia, to one of whom he was engaged to be married. They made several purchases at one of the stores, and left the wedding dress in the hands of a dressmaker. Some other articles were also selected, and left at the store to be paid when called for. On his return home his father learned that the dress was missing, and he immediately set out to find the thief. He was successful in finding the thief, and the matter was settled.

OTTAWA, April 29.—The house again into committee on the Franchise Bill. Sir John announced that government would abandon the female franchise provision. The sitting, so far, was occupied in discussing the interpretation of the word "owner" as affecting Quebec. A number of amendments were made and discussed.

ORIGIN OF OPIUM.

A lovely girl, a King and a Sage have fallen in the hands of the British. According to the legend there once lived on the banks of the holy river Ganges a rishi or sage in whose hut, made of palm leaves, there was a mouse which became a favorite with the sage, and was endowed by him with the gift of speech. After awhile the mouse, having been frightened by a cat, at its earnest solicitation, fled from the rishi into a beautiful maiden, to whom it gave the name of Postomani or Poppo-seed lady. One day, while tending her plants, the king approached the rishi's cottage, and noticed a rat eating a fresh himself by Postomani, who offered him some delicious fruit. The king, however, struck by the girl's beauty, refused to eat with her, and he left her to her fate. The rishi, seeing this, was angry, and he cursed the king, and he was struck by a lightning bolt. The king, seeing this, was terrified, and he fled from the rishi. The rishi, seeing this, was angry, and he cursed the king, and he was struck by a lightning bolt.

Col. Otter's Engagement. Gen. Middleton makes another advance. BATTLEFORD, May 6.—Further details of the engagement between Col. Otter's forces and Chief Poundmaker's Indians show that the fight lasted seven hours. The Indians used muskets, war clubs, spears, bows and arrows, and every conceivable weapon of warfare. No mention is made in the dispatches of the killed and wounded being brought back, and it is judged from the hasty return march that they were left behind. Nothing but the last extremity would induce Otter to do that.

Col. Otter's Advance. A traveler in the south of France was recently passing through a forest when he suddenly met a dozen, as he thought, suspicious characters. His first thought was to make his escape, but he was surrounded and after some general conversation about trees and scenery, he was told to get out of the forest. The traveler, however, was not to be frightened, and he remained in the forest. The characters, however, were not to be frightened, and they remained in the forest. The traveler, however, was not to be frightened, and he remained in the forest.

Reduced Newspaper Postage. (New York Times.) One order has been issued by the Post Office Department in which the postage on a new one-cent postage stamp issued July 1st because of the law passed on the 27th of March, 1887, reducing the rate on newspapers. The stamp is to be similar in design to the present series of newspaper stamps ranging from 1 to 10 cents. During the year ending on the 31st of March, 1887, the postage on newspapers was \$2,899,919. It is estimated that the reduction to 1 cent per copy will result from numerous islands which stand the Seine between Poissy and Rouen, and which would render navigation exceedingly dangerous for vessels of large tonnage, such as those that pick their way carefully from Havre to Rouen. Paris as a Seaport. The old idea of making Paris a seaport, ventilated in 1825, has again been taken up by an engineer, M. Barthelemy de Griy, who is a member of the Institute, and is published in the Telegraph. He proposes to deepen the Seine between Rouen, where large vessels cannot or are towed up from the mouth of the river, and Paris, which is a member of the Institute, and is published in the Telegraph. He proposes to deepen the Seine between Rouen, where large vessels cannot or are towed up from the mouth of the river, and Paris, which is a member of the Institute, and is published in the Telegraph.

For the Alaska Gold Mines. (Oakland Evening Tribune.) The Omikah Gold and Silver Mining Company, whose prospecting party was lost in October, 1883, with all its board, on the return trip from its mine, are about to set out another expedition to the north. They have chartered a schooner, the "Alaska," owned by Higgins & Collins, and plying between San Francisco and Mexico. She was built by ex-Governor News, and is a fine vessel, well adapted for a cruise among the icebergs of extreme northern possessions. The schooner will be fitted out with provisions for a year, and will take up sixteen miners and six miles of M. B. Sturges of Irving is president of the company. C. Robinson is secretary, and E. Nevada Bank, treasurer. The expedition will start about May 1st for Alaska.

Religious Ceremonies Preparing for Heaven. A Celestial Trip that Will Have to be Postponed—All Cland in Garments White—A Millieric Revival. BOSTON, April 30.—Not since the agricultural fair at Falmouth in 1879, has fanaticism reached such a height in England as indicated in a story from the north. The region in which it is now rampant is in the north of England, and it is said to be spreading rapidly. The fanaticism is of a peculiar kind, and it is said to be spreading rapidly. The fanaticism is of a peculiar kind, and it is said to be spreading rapidly.

What an Insane Robber Did. (New York World.) The merits of the two soldiers, the Russian and Afghan, are freely discussed, as they stand in front of each other's guns. The Russian is justly derided as a coward, and the Afghan is well described. If he lacks the clan of the French he has more steady nerves. He is of sun temper and he is a good soldier. He is a good soldier, and he is a good soldier. He is a good soldier, and he is a good soldier.

A Feast of Blood. What an Insane Robber Did. (New York World.) The merits of the two soldiers, the Russian and Afghan, are freely discussed, as they stand in front of each other's guns. The Russian is justly derided as a coward, and the Afghan is well described. If he lacks the clan of the French he has more steady nerves. He is of sun temper and he is a good soldier. He is a good soldier, and he is a good soldier. He is a good soldier, and he is a good soldier.

A City on the Move.

From recent surveys it has been ascertained that the entire city of Virginia, Nevada, has moved over thirty miles to the east since the big fire of 1875. The Maynard block, in Golden Hill, is known to be gradually sliding and has moved nearly two feet since its erection. This movement is so gradual that it does not affect in any manner the safety of the building, as the ground to a depth of nearly one hundred feet to the bed rock is a well known fact among practical miners that the ground on which Virginia City is built is what is termed a slide, and it is necessary to sink nearly one hundred feet before finding the natural bed rock. These slides are caused by the constant crumbling of the rocks on the mountain sides. The debris thus accumulated through innumerable ages is constantly gravitating downward, and in a few hundred thousand of years it is known as the slide of Virginia City will be nothing but barren bed rock.

A Hundred Napoleons Ahead. A traveler in the south of France was recently passing through a forest when he suddenly met a dozen, as he thought, suspicious characters. His first thought was to make his escape, but he was surrounded and after some general conversation about trees and scenery, he was told to get out of the forest.
