

NOTICE OF SALE

to Charles Poliquin, of the Town of  
Riverview, in the County of Resti-  
che, and Province of New Brun-  
swick, merchant, and Margaret Pol-  
iquin, his wife, and unto all others  
whom it may or shall concern:

Notice is hereby given that under  
the authority of a power of sale con-  
tained in a certain Indenture of Mort-  
gage bearing date the seventh day of  
October, A. D. 1865, made between  
said Charles Poliquin, and Mar-  
garet Poliquin his wife, of the one  
part, and one James Martin of the  
other part, in the County of Resti-  
che, Farmer, of the other part,  
which Mortgage was duly regis-  
tered in the Thirtieth day of October, A.  
1906, as number 2797 on page 429  
of 422, 423 and 424 in Book "V" of  
Records of the County of Resti-  
che.

And notice is hereby given that  
under and by virtue of a power of  
sale contained in a certain Indenture of  
Mortgage bearing date the Fifth day of  
January, A. D. 1865, made between  
said Charles Poliquin and Mar-  
garet Poliquin his wife, of the one  
part, and one James Martin of the  
other part, in the County of Resti-  
che, Farmer, of the other part,  
which Mortgage was duly regis-  
tered in the Twelfth day of November, A.  
1906, as number 2821 on page 291,  
292, 293 and 294 in Book "X" of  
Records of the County of Resti-  
che, there left for the purpose of  
satisfying the money secured by said  
Mortgage Indenture of Mortgage, al-  
l having been made in the pay-  
ment thereof, he sold at PUBLIC  
AUCTION, on WEDNESDAY the  
TENTH DAY OF OCTOBER, A.  
1909, at ten o'clock in the forenoon  
front of the Court House, in the  
Town of Riverview, in the said County,  
and singular that certain piece  
of land, situate in the Town of  
Riverview, in the County of Resti-  
che, and bounded as follows:—  
beginning at a point on the north  
side of William street one hundred  
and sixty feet distant westerly from  
a point of intersection of the water-  
side of Brunswick street and the  
north side of William street,  
thence at right angles in a northerly  
direction forty five feet from high  
water mark, thence in a westerly di-  
rection fifty feet, and to within ten  
feet of high water mark, thence in a  
thence direction north it strikes Wil-  
liam street forty five feet to the place  
beginning, and preserving the same  
thence from front to rear.  
Dated this seventh day of July, A.  
1909.

FACTORY GOODS

Write for this  
Catalogue to-day

ATTENTION!

I have just opened up many new lines  
which makes my stock of Dry Goods, Ladies  
Clothing and Coats complete in all lines and  
my prices are right.

GENT'S FURNISHINGS.

A complete line of men's suits, boots and  
shoes, shirts, collars, ties, hats and caps, etc.,  
also jewelry. Wholesale and retail.

EMILE DAVID,

Next Albion Hotel, Water St., Campbellton.

J. & D. A. HARQUAIL Co.  
CONTRACTORS & BUILDERS.

Sash and Door Factory,  
Planing Mill and Dry Kiln.

We carry a full line of all building materials. Special de-  
signs and estimates furnished for Store Fronts, Church, Office and  
School Buildings. Plans and Specifications for any class of Building  
furnished at reasonable prices. Phone, Wire or Write your orders.  
None too large for our capacity or too small to receive our prompt  
and best attention.

We have unusual facilities for doing things right and getting  
all work out on time. The persistency with which we consider the  
interests of customers on a par with our own, means that your  
good will with us counts for more than profit.

BRANCH WAREHOUSE, Dalhousie.

Peel Your Eye!

And see the most complete exhibition of Fur's ever held in town,  
which is now open. It costs you absolutely nothing to inspect our  
immense stock.

NO SHOP WORN GOODS HERE

Everything entirely new in style and material. Ladies' and  
Gent's Fur-lined Coats made to measure. Thousands of dollars  
worth of specially selected furs, every piece a gem, have arrived at  
Campbellton's Leading Tailor and Furrier.

NO CAUSE TO WORRY.

When you leave your order here for any garment, you know  
you get the best there is for least money. We carry the best and  
most up-to-date stock on the North Shore. You are cordially invited  
to inspect our goods.

judge its merit, one need look no further.

GAMBLING CAUSES  
RAILROAD WRECKS  
Surge's in Convention also Attribute  
Accidents to Jealousy and Jealousy  
by Drivers—Color Blindness  
a Factor

(New York Herald)  
Brooding caused by jealousy on the  
part of an engine driver, worry by  
another because he had gambled away  
his wages and color blindness on the  
part of others which made them in-  
capable of distinguishing signals have  
been some of the causes of railway ac-  
cidents, according to statements made  
Tuesday at the eighteenth annual  
meeting of the New York and New  
England Association of Railway Sur-  
geons, held in the New York Acad-  
emy of Medicine in West Forty-third  
street.

Dr. R. W. Corwin, division surgeon  
of the Missouri Pacific, cited the case  
of the man who backed his train into  
an excursion train while he was think-  
ing of the money he had lost at cards.  
He denied that railroad companies  
overworked their men by intention.  
Sometimes drink is mistaken for brain  
fog and overwork, he added, and the  
man who uses his hours of recreation  
for gambling, drinking and smoking  
to excess is not fit for work. I am  
told that the greatest trouble the man-  
ager of a large railway had was to  
provide counter attraction to the salo-  
ons and gambling halls to which the  
men went when off duty.

Continuing, Dr. Corwin said the pub-  
lic has a right to demand that railway  
employees be given sufficient rest to in-  
sure greater efficiency and safety to  
the traveling public, and that it might  
become necessary to re-organize the  
medical departments of the railways  
in order to keep the men in good phy-  
sical condition and to provide them  
with a good environment.

Discussing signals, Dr. C. A. Place,  
of Burlington, Vt., read a paper by  
Prof. George M. Stratton, of the Uni-  
versity of California, saying the physi-  
ological tests for the color  
blindness of the men in charge of  
signals that can now be relied upon  
when the weather is clear are red  
and green, but for often renders these  
useless. According to Prof. Stratton,  
the medical departments of the rail-  
ways should be re-organized so that  
some men employes of railroad now  
in service have defective eyesight. One  
hundred persons may be killed in an  
accident, he continued, "because of  
failure of the color sense on the part  
of the engine driver. For this reason  
the examinations of all employes  
should be conducted mercifully."

He suggested that the system of  
signaling by night lamps, as used in  
the United States navy, and the use  
of the illuminated arm signals in con-  
nection with the semaphore plan, be  
followed as closely as possible.

CONDENSED DESPATCHES  
The hurricane danger at Key West  
is estimated at \$2,000,000.  
At Kansas City, Mo., Tuesday, John  
Hussey, 23 years old, walked into the  
police station and asked to be placed  
under arrest asserting that he had  
been dodging the police two and a  
half years for robbery in Lynn, Mass.  
in February, 1907, and says he is in-  
nocent.

Bedford, who confessed to the Kin-  
rad murder, claims he killed King

NO CLUE TO THE  
MURDER CASE

PROVIDENCE, R. I. Oct. 13.—Chief  
Inspector Constant S. Horton said that  
the report that the local authorities  
expected to find an important clue in  
the suit case, murder mystery here was  
false. He said he did not think that  
the murder was committed in this city  
as all the girls reported missing from  
here have been located with the excep-  
tion of one and she did not go away  
until Monday. He said that he had  
received no formal notice of the mur-  
der from the Tiverton authorities and  
that he had detailed his men to work  
on the case here.

steamer has not carried a "passenger  
of that name."  
Montreal, Wright, who married Flor-  
ence Kinrad's sister, and who was  
come east at any time to identify the  
man who has confessed to the Kinrad  
murder.

A turtle weighing 1100 pounds was  
caught in a fisherman's net off Hal-  
fax. This is believed to be a record.  
McGill, Montreal, will preserve the  
body of the celebrated

Prof. Francisco Ferrer the Spanish  
educator and convicted revolutionist  
was shot today at the fortress at Bar-  
celona, where he had been confined  
since his condemnation by court mar-  
tal. He faced the firing squad with  
out flinching and fell dead at the first  
volley.

CHATAM, Oct. 13.—Fascinated by  
the magnetism of Capt. Kidd's treas-  
ure, a number of men are seeking with  
"gold," "silver" and "diamonds," in  
the body of the celebrated  
"quarrelsome" pirate. This time, the  
search is a miniature island, located  
approximately four miles from Mis-  
sou Island, on Bay Chaleur. The is-  
land is appropriately named Money Island  
and is only a few hundred yards in  
circumference.

A New Yorker who was in Chatam  
this week reports that cavities on the  
islet are as deep as twenty feet and  
the extremely numerous. The expected  
reward has not materialized, and in  
a week or two it is believed that the  
operations now in progress will be  
abandoned.

The island is eighteen miles from  
the New Brunswick mainland and has  
supplies for the expedition, which has  
been divided into two numbers, are ob-  
tained at Carleton.

Exposed, as it is to the elements,  
the islet is practically uninhabitable,  
and in winter it is as dismal a region  
as one would expect at the North Pole.  
Frequently, the mercury registers far-  
ther below zero, and for weeks  
the intense sever all communication  
with the mainland.

On a morning last summer two men  
from Misou Island, which is sparsely  
settled, embarked in a sail boat for  
Carleton, and according to their plans  
were to return to Misou late in the  
afternoon. The boat was blown over-  
board and at the urgent suggestion of  
the hotel proprietor in Carleton one of  
the men decided to remain in the  
disaster port, until the gale had  
passed. His companion could not be  
dissuaded from returning, and several  
days afterwards the craft was cap-  
sized, inverted, drifting on the shores  
of Misou Island. His body was never  
recovered.

TO RECLAIM MESOPOTAMIA  
Sir William Willcock Engaged in Gigan-  
tic Work in Mesopotamia's  
Land

It is a historical fact that the area  
between the Tigris and the Euphrates  
Rivers, in Turkey-Syria, is a land  
of about 300,000 acres, once support-  
ed a population of from ten to fifteen  
millions. There now it contains less  
than 1,000,000. In other words, the  
once flourishing land of Mesopotamia  
has become almost a desert waste,  
with countless ruined cities and only  
here and there a hamlet marking an  
oasis which has been preserved from  
destruction.

Of important bearing therefore, upon  
the deterioration of this territory is  
the announcement of the Turkish Gov-  
ernment that they have engaged Sir  
William Willcock to reconstruct and  
contemplate irrigation and canaliza-  
tion works in Mesopotamia and ad-  
jacent areas. Some four years ago Sir Wm.  
Willcock attracted an audience in  
Cairo by his description of the ancient  
irrigation works on the Tigris and the  
Euphrates, and his forecast of the possi-  
bilities of reconstructing them in  
modern scientific principles. In the  
old days of 1905 Sir William vis-  
ited Baghdad and made a rough survey  
of the country, upon his return to  
London he gave enthusiastic estimates  
of the future of this ancient gran-  
ary.

The new Constitutional Government  
of Turkey has given Sir William the  
opportunity he has long sought and  
his plans have been accepted by the  
Young Turk Party in control with en-  
thusiasm. The future of Turkey lies  
in Aral, has become the motto of the  
people. The magnitude of Sir William's  
scheme may be gauged from the fact  
that rough estimates place the irri-  
gation at nearly 2,000,000 acres,  
the expenditure at \$100,000,000 and  
the capital value of the land when ir-  
rigated at \$200,000,000. The possibil-  
ities are vast.

In the days of the Assyrian and  
Sassanian Kingdoms the delta of the  
Tigris and Euphrates was the granary  
of the world. This alluvial plain, ex-  
tending 400 miles inland from the pre-  
sent shores of the Persian Gulf, was  
celebrated for its fertility. Of all  
countries that we know, wrote Herod-  
otus, "there is none so fruitful in  
grain. It yields commonly 200 bush-  
els of wheat per acre, the production is  
even 300 fold, and the blades of wheat  
and barley plants are often four  
fingers in breadth."

This productivity was mainly due  
to irrigation. The great Nabian  
canal took off from the Tigris on the  
left bank, and supplied a whole plexus  
of canals and irrigated an immense  
area before it rejoined the river a little  
below Badrai. On the eastern side the  
Dijlah Canal, over 100 kilometers long  
and 50 meters wide, irrigated the  
lands above flood level as far south as  
Bagdad. In the neighborhood of Bag-  
dad these labyrinthine canals converted  
the plain into one vast garden. But  
the preservation of this hydraulic  
works argues the existence of a strong  
central Government. The crumbling  
Sassanian kingdom was rivied by the  
Arabs, and the desertion of its an-  
cient bed by the main stream of the  
Tigris cut off the supply of the mighty  
canals, and left them high and dry.  
The Persian nobles and landlords were  
powerless to repair the dikes, the main  
portion of the canal system became  
obscured, and the smiling gardens  
succumbed to the conquering desert.  
Nevertheless all the conditions which  
made ancient Chaldaea a laughing corn  
land remain, except the human direct-  
ing force. The Tigris and Euphrates  
carry to the sea enough water to make  
the desert bloom again, and to float  
the laden barges to the sea. The soil  
needs only water to resume its  
traditional fertility. Even now the  
traveler cannot fail to be impressed  
by the evidence of amazing agricul-  
tural wealth revealed by the clas-  
sical date groves of the flood lands  
of the Shatt-el-Arab, and at Basra the  
ocean going timbers—their cargoes  
of grain in bulk. Nothing is needed  
but money, brains, and labor to make  
the Tigris-Euphrates Valley just such  
a waving wheat field as the Chenab  
and Jhelum canal colonies. This is  
the task to which Sir William Will-  
cock has bent all his energies.
