BUSINESS DEPARTMENT.

COMB HONEY AND HOW TO RAISE IT.

We have just got through with the very interesting and instructive little book of W. Z. Hutchinson, of Rogerville, Mich. The work is on the production of comb honey as practised by himself, at least that is the title page, but after perusing it carefully we think he should have added "And many other interesting and valuable suggestions." We first thought of making quotations from a few of the most interesting parts, but afterwards concluded that it would neither be doing Mr. H. nor the work justice, as almost every line is interesting, and every page is filled with valuable matter. would advise all bee-keepers to get the book at once. . It is worth its weight in gold. It teaches how to make money and how to save it. predict a large sale for it, not only in America but on the continent. Mr. H. is well known as one of our foremost and most practical beekeepers and matter from his pen is much sought after.

PHOTO-ENGRAVING OF THE ENGLISH EXHIBIT.

We are afraid our good Friend Ernest has got things just a little mixed in his description of the honey exhibit at the Indian and Colonial Exhibit as he has it on page 252, Gleanings, last issue. The Exhibit of which our Friends have the sketch is of the show in the Royal Conservatory and it was over before the Canadian delegates reached London, so that they had not the pleasure of seeing it. Friend Ernest seems to have gained the idea, by some means, that the English and Canadian Exhibits were made in the same building. Not so, however. building of which our Mr. Jones gave the dimensions and which he thought perhaps you had got a photo of, was the one in which the Ontario Honey Exhibit was made, and was one specially built for the purpose. We are sorry that there were no photographs taken of the Canadian exhibit, except the miserable one in the Pall Mall Gazette, which we did not care to copy.

Mr. Jones endeavored to have photo views taken but could not get it done, except at a price which he did not think it was fair to undertake. The engraving which is given in Gleaaings is very good, and will be interesting to its many readers.

PRICES CURRENT
