TLOUR.-We have to note a week of unusual activity, and an excited market. Receipts though hberal have not been in proportion to the demand, which since navigation fairly opened has been very spirited Prices of the several descriptions took an immediate upward turn, and rates have continued to advance, closing at 89 to 89 25 for the several grades of superline Prices of the higher and lower grades have been very various according to circumstances, sample, &c. Bay flour-has been sparingly supplied from abroad, and the demand has mainly been met by the local millers, rates various, but for choice, ranging in the vicinity of \$4.49 to \$4.3). Bye flour-has again improved, and latest sales have been in the neighbourof \$625. We note a quieter feeling at the close, and a disposition on the part of buyers to resist the extravagant pretensions of sellers.

OATMEAL-Has also had a rapid advance, and sales are reported at \$6 50.

WHEAT -There are few if any sales to report, and quotations may be considered purely nominal.

PEASE -There is less inquiry and prices have slightly fallen, latest sales have been at 23c to 23 c per of lbs.

OATS-Are scarce and active, sales being recently made at 45c and 46c to 47c is now obtainable for good samples suitable for seed.

Ponk .- The demand during the week has been less active than before; holders are, however, firm, and in a few instances buyers have had to submit to extreme rates to supply pressing orders for immediate shipment. Buyers and sellers are not apart to any great extent in their views of price, and a small mutual concession would probably induce transactions. Stocks are generally understood to be light, and with moderate arrivals no material decline is anticipated.

LARD -Sales to some extent have been made. Late British advices note an advancing tendency

CUTMEATS, HAMS, &c , are only in moderate demand, and rates are unchanged.

BUTTER has continued without movement during the week. The demand from the Maritime Provinces has been very trifling, and with low range of prices ruling in Boston, New York, as well as in Britain, old Butter is not likely in any material degree to improve. either in price or demand. Holders are anxious to close out before new comes in, but the stock is in few hands, and at present low prices they are unwilling to submit to any further concession.

ASHES - Receipts proving larger than were looked for, the market has become unsettled, and prices of Pols since our last have declined, touching \$5 65 to \$5.70, but at the close more firmness was manifested, and rates slightly recovered, closing at \$5.75 to \$5.80, according to tares. Pearls are in fair request, and prices have not materially changed.

N B BFFF—Extrained distinguality includes nothing but the best, large, fat, stall-fed oxen; second quality includes the best grass-fed oxen, the best stall-fed cows, and the best three-year old steers; ordinary consists of bulls and the refuse of lots.

SHEFF—Extra includes Cosets, and when those of an inferior quality are thrown out.

BEVALUES.

CATTLE.—There were 188 Northern Cattle at market, and 66 Western that were driven over from Brighton, which made up the stock at market this week. Although the supply was light, there was not any advance in prices from last week. There were but few buyers at market, they having supplied theosehes last week at the reduced rates. Some few extra Cattle were sold at \$1450 per cut. 39 per coat shrinkage, that came from Canada, and were purchased by S. F. Woodbridge: there was also another lot brought in by Mr. Bradbridge and sold at \$10.50 per cut. live weight, or about \$15 per cut., 30 shrink. These lots were of better quality than any at market last week.

These lots were of better quanty than any at market last week.

SHEEP AND LAMNS—The supply at market was light, but prices are without material change, as the demand is quite light. The quality is about the same as last week.
