

LISTERINE

The original antiseptic compound

(Awarded Gold Medal (Highest Award) Lewis & Clark Centennial Exposition, Portland, 1905; Awarded Gold Medal (Highest Award) Louisiana Purchase Exposition, St. Louis, 1904; Awarded Bronze Medal (Highest Award) Exposition Universelle de 1900, Paris.)

Listerine represents the maximum of antiseptic strength in the relation that it is the least harmful to the human organism in the quantity required to produce the desired result; as such, it is generally accepted as the standard antiseptic preparation for general use, especially for those purposes where a poisonous or corrosive disinfectant can not be used with safety. It has won the confidence of medical men by reason of the standard of excellence (both as regards antiseptic strength and pharmaceutical elegance), which has been so strictly observed in its manufacture during the many years it has been at their command.

**The success of Listerine is based upon merit
The best advertisement of Listerine is—Listerine**

Lambert Pharmacal Company
St. Louis, U. S. A.

Philadelphia Polyclinic and College for Graduates in Medicine.

The hours for Clinical Medicine, Diseases of Children, Diseases of the Stomach and Intestines, and Diseases of the Nervous System are arranged so as not to conflict, making it possible to take a comprehensive course in General Medicine with a minimum expenditure of time. Practical work in Physical Diagnosis and in the examination of Stomach cases.

A Special Week in Diseases of the Eye will be held from March 24th to 29th, being the first week in the new three months' course.
