

3. Money orders or cheques payable to the Receiver General for Canada are acceptable forms of payment, and must be included with your application for an export permit. For more information about payment methods please refer to Notice to Exporters No. 109. Exporters who make frequent shipments may prefer to be placed on a monthly billing system. If you would prefer to be billed monthly, rather than making advance payment for each individual permit, please submit your request to:

Director General
 Export and Import Controls Bureau (EPD)
 Department of Foreign Affairs and International Trade
 P.O. Box 481, Station "A"
 Ottawa, Ontario
 K1N 9K6

General Export Permits (GEP)

4. General Export Permits (GEP) enable an exporter to export certain goods which are subject to control to eligible destinations without the necessity of submitting individual export permit applications. A GEP is a valid export permit, which is used to minimize the administrative burden for exporters and to streamline licensing procedures. By using a GEP, exporters do not have to apply to EPE/DFAIT for an individual export permit for each shipment of goods. Instead, a simple administrative procedure is used. No additional paperwork is required for exporters, and DFAIT does not become directly involved. However, some GEP's contain conditions, which must be adhered to in order to use them. In some cases, the use of a GEP is conditional on an exporter undertaking to report on actual volumes of exports or on specific final consignees made against the GEP.

GEP's are available for specific goods, and specific destinations. The following is a list of available GEP's:

GEP 1: Export of Goods for Special and Personal Use	GEP 31: Peanut Butter
GEP 3: Export of Consumable Stores Supplied to Vessels and Aircraft	GEP 33: Computers
GEP 5: Export of Logs	GEP 34: Telecommunications
GEP 12: United States Origin Goods	GEP 35: Certain Industrial Goods
GEP 26: Industrial Chemicals	GEP 37: CWC Chemicals and precursors to the USA
	GEP 38: CWC Chemicals and precursors mixtures.
	GEP 39: Mass-Market Cryptographic Software

Again, GEPs apply only to eligible goods or destinations. For details about using a GEP, please contact the Export Controls Division or go to the departmental WEB Site at: '<http://www.dfait-maeci.gc.ca>'.

Nuclear and Atomic Energy Goods and Technologies

5. In addition to the nuclear and nuclear-related items identified in Groups 3 and 4 and certain items in Groups 1 and 2, the Canadian Nuclear Safety Commission - CNSC (formerly the Atomic Energy Control Board) also controls, by regulation under the *Nuclear Safety and Control Act* (formerly the Atomic Energy Control Act), certain radioactive substances and isotopes which are deemed capable of releasing atomic energy or being required for the production, use, or application of atomic energy.
6. Exporters of certain radioactive materials not identified in this Guide, as well as Groups 3 and 4 goods require an export licence from the CNSC. Information relating to such controls may be obtained by contacting the Export Controls Division or:
