

undertaken by the Commission in accordance with the provisions of Article 6 for a period prescribed by the Commission.

8. The liability of a Party to on-site inspections pursuant to paragraph 2 or 3 of this Article shall commence from the date on which the Treaty enters into force for that Party. The annual period in which the number of on-site inspections for each Party may be carried out shall commence on the date of entry into force of the Treaty and thereafter on the anniversary of that date in each succeeding year. In the case of a Party which deposits its instrument of ratification or acceptance after the date of entry into force of the Treaty, the number of on-site inspections which may be carried out in territory under its jurisdiction or control in the period remaining before the next anniversary of the date of entry into force of the Treaty shall bear the same proportion to its number determined in accordance with paragraph 6 of this Article, as that period bears to one year, but shall not be less than two. If the number of on-site inspections calculated in accordance with the preceding sentence includes a fraction, that fraction shall, if it is smaller than one-half, be disregarded, or, if it is one-half or greater, be regarded as equivalent to one.

9. Notwithstanding any other provision of this Article, the Commission may direct the Administrator to carry out on-site inspection in territory under the jurisdiction or control of any Party either at the request of such Party or pursuant to an agreement made by such Party prior to or subsequent to signature of the Treaty. Inspections carried out under this paragraph shall not be deducted from a Party's number. Inspections carried out pursuant to paragraphs 2 and 3 of this Article shall take priority over inspections carried out under this paragraph.

10. The Administrator shall make available to all Parties to the Treaty within twenty-four hours after receipt all reports submitted to him by on-site inspection groups, together with any relevant data and analyses.
