

the "catch" of whales which swarm in these waters, has taxed the plant to its full capacity—**With Countless Whales Uncaught.** Surely the further development of this enormously rich natural source of wealth and prosperity to Graham Island will not be long delayed.

The **TIMBER OF GRAHAM ISLAND**, consisting of red and yellow cedar, spruce, hemlock, etc., lies for the most part in heavily timbered strips, varying from one-quarter of a mile to a mile or more in width along the coast and shore lines and along the banks of inland lakes and waterways, comprising hundreds of miles of easily accessible timber. **SAW MILLS** are operating on the island with the certainty of the establishment of mills of much greater cutting capacity in the very near future.

TIMBER AND SAW MILLS MEAN PROSPERITY.

THE AGRICULTURAL LAND OF GRAHAM ISLAND is estimated as 400,000 to 500,000 acres, and forms one of the largest blocks of farm land in British Columbia.

**THE FUTURE PROSPERITY OF GRAHAM ISLAND IS ASSURED BY ITS
FARMING POSSIBILITIES ALONE.**
