STRENGTH FREE TO MEN

How to Regain it Without Cost Until Cured

Strength of body—strength of mind! Who would not possess it if they could? it is nature's greatest gift—our most valuable possession. Without this strength life is a failure, with it everything is possible. Almost every man was made strong, but few have been taught how to preserve this strength. Many, through ignorance, have wasted it recklessly or used it up excessively, leaving the body exhausted, the nerves shaky, the eyes dull and the mind slow to act. There are thous-ands of these weak, puny, broken-down men dragging on from day to day who might be as strong and vigorous as ever they were if they would only turn to the right source. Electricity cures these weaknesses. It gives you back the very element you have lost. It puts new life into the veins and renews the vigor of youth. For 40 years I have been curing men, and so certain am I now of what my method will

tain am I now of what my method will do that I will give to any man who needs it my world-famed DR. SANDE N ELECTRIC BELT AND SUSPENSORY FREE UNTIL CURED. You pay nothing down, you deposit nothing, you risk nothing; but upon request I will furnish you with the Belt to use, and if it cures you pay me my price—in many cases not over \$5.00. If you are not cured or satisfied, return the Belt to me and that ends it.

As I am the originator of this method of treatment and have made it a great success, there are many imitations of my Belt; but my great knowledge, based on 40 years' experience, is mine alone. My advice is given free with the Belt.

This offer is made especially to men who lack strength and vitality, who have drains, losses, impotency, varico cele, etc., but I also give my Belt on the same terms to sufferers from Rheu matism, Lame Back, Sciatica, Kidney,

Liver and Stomach Troubles.

Call or write for a Belt to-day; or, if you want to, look into the matter further. I have two of the best books ever written on Electricity and its medical uses, which I send free, sealed, by mail.

KEARSARGE TURRET FIRED SIX U.S. SAILORS KILLED

Inspector Davis Issues Instructions Fatal Disaster on Battleship Occurs on a Friday, the 13th of Month.

Washington, April 14.-Two years to of hotelkeepers in No. 1 division that a day later than the fatal Missouri dishereafter they must not permit the aster, and on a Friday and the 13th of "Gay Cats," or men known to be the month, six men were killed in the most impossibility of prevention. The Atlantic fleet, the strongest fighting fleet America has ever owned, been for weeks engaged in the ribbean Sea, culminating in the quarterly target practice. This practice was just about concluding with most satisfactory results up to yesterday, and it confidently was expected at the department, upon the basis of preliminary reports received, that all records would be broken in the matter of rapidity of fire and efficiency of the gunners. But to-day, just at the close of came a cablegram from Real Admiral Evans, the commanding chief of the Atlantic fleet, telling of a dreadful ac-cident on one of his best ships, the Kearsarge. The news came from Caimanera, a little cable station at the mouth of Guantanamo Bay, indicating that the Kearsarge itself had arrived at that place.

> "Caimanera, April 14, 1906. "Secretary navy, Washington,

"Lieut. Joseph W. Graeme, gun um-pire, has been sent to the Maryland in a very critical state about 9. p. m. in a very critical state about 9. p. m. The following have since died; Lieut. Hudgins, turret officer; Peter Norberg, gunner's mate; Theodore Neagely, seaman; Anton O. Thorson, ordinary seaman; Julius A. Koester, turret captain, first class; Ellis N. Athey, seaman. The following were dangerously injured by accident, recovery doubtful: W. King, ordinary seaman. "Will bury dead at Guantanamo. Vessel uninjured."

The Kearsarge's forward turret.

The Kearsarge's forward turret, where it occurred, is of the superposed type, in other words, an eightoccurred. In the lower turret were 24 men and in the upper turret 16. An ammunition hoist connected the two and had the powder in the lower automobiles he ascended to a height of a height o

Probable Cause. As the cablegram states, the cause of the ignition was not known, but the first belief at the navy department is that in cleaning up the turret and throwing open the breeches of the big guns after the last round had been fired, some small bit of smoldering canvas bagging was blown out of one of the gun; as the big breech block was swung around, only to fall upon the loaded ammunition hoist where the surplus powder was being returned to the magazines below. Had the remainder of this powder exploded there might have been a repetition of the Missouri disaster, when 26 men were killed in the turret and in the magazines below.

The Kearsarge is regarded as one of the best battleships in the American fleet, is of 11,520 tons displacement and 375 feet in length. She was launched in 1898 and commissioned in 1900.
