# Smoke-Marguerite

Made from the Finest Vuelto Abajo Tobacco of our latest im-

Monte Cristo Stocks.

Rossland Miner, July 1.

The strike in the 300-foot level of the Monte Cristo has widened out to 11 feet of clean shipping ore. In fact it is the main pay chute of the property. It will average \$25 clear across the 11 feet. The output this week will be somewhere between 50 and 60 tons. The quantity of ore shipped could be materially increased if there were more power for the drills. The compressor on the Monte Cristo keeps two drills going on the Monte Cristo, and two on the Virginia, It also keeps one hoist and one pump going on both these properties. As soon as the West Kootenay Power & Light company puts in its plant an electric hoist will be installed, and this will allow a couple more drills to be put in use on the Monte Cristo and thus increase the ore cutput. It will take at least \$90 days 40 install the 35-drill comuse on the Monte Cristo and thus increase the ore cutput. It will take at least 90 days to instal the 35-drill compressor that is to be put in at the Monte Cristo to supply that mine and the Virginia with power. When this is placed in position the output of ore from the Monte Cristo will be greatly increased.

Lardeau-Goldsmith Mines, Limited. The following very rich returns have been received from the ore shipped from these mines: gold, 1.08 oz.: silver. 585 oz.; copper 22.4 per cent.; value \$395 per

The properties are situated at the head of Pool Creek,in the Lardeau Mining Division of West Kootenay, B.C. The office of the company is in Rossland. The shares have had a phenomenal infinerease in value latity and are now

selling at par.
The Placer Machine. The Placer Machine.

The Morrison Gold Saver, at present being run by electricity in Rat Portage and treating the sand and alluvial of this district and finding gold values in all so far treated, is interesting and shows great enterprise and push on the part of Mr. J. Moody, President of the Klondike Exploration Company, Limited of London, Ont., in having secured the sole right of manufacture and sale, and to establish the only manufacture of placer mining machinery in Canada. They are bound to fill a great want of mining companies, and will give this company accurate particulars of all mining fields in Canada and other parts of the world. The editor has seen the machine in operation and believes it will prove to be suited to the needs of this country.—Rat Portage Miner.

RUPTURE Two more extraordinarily bad cases, one after vainly trying Trusses on the side, went home to London, but the truss makers there failed also. After returning home he was 'advised by two of his medical brethren to come to us, a distance of over 1200 miles. The other was a gentleman in this city, and, although a desperate case, we succeeded with both parties. If those who are ruptured would only get a suitable truss in the commencement they would save themselves much suffering, and many more would get cured. We warrant all our trusses.
