Argentina's Exportable Surplus. Argentina-Mr. William Goodwin, the welk-known authority on the grain trade of Argentina, in a long letter to The Corn Trade News, dated Buenos Ayres, Dec. 30, takes a very optimistle view of the out-turn of the recent wheat harvest there. He estinates the acreage under this crop, 5,-500,000 acres, which is 10 per cent, increase over any previous year; average yield per acre, 15 businels; total crop, 2,250,000 tons tof 22041/2 lbs.): home consumption, 650,000 tens; export surplus, 1,600,000 tons (about 58,000,000 hushels), and he says: "There are no failures of crop in any district, and quality will be generally good." He do-ss not think that the low gold premium will affect the question to any extent worth noticing." Wellington and Frent Sts. East,
