The infustrial workers feel precisely the same way. They are convinced that, somehow or other, they must do better, share more largely in the bulk of riches which they enable the race to amass.

The Star proceeds to sav:

Brave words, but what do they mean? We were under the impression that wages had been steadily rising and that a larger percentage than ever before of gross earnings found their way into pay envelopes. For example, we are told by Presider Kelley of the Grand Trunk that the average wage for a man per year on the Grand Trunk has increased 157 per cent during the past seven years. Out of every dollar collected in passenger and freight rates by the Canadian National Railways system, 80 -cents goes into the pay envelopes of the employes. The wage-earners are receiving more than they ever did before, and the farmer is having the election will, in all probability, be fought on that issue.

Election will, in all probability, be fought on that issue.

If the Liberals win they will not carry out their free trade promises, for there is no honestly convinced free trade opinion in the Liberal party as a whole, the there may be a few individual free plains, stated that the Farmer-Inde-

MORE How is the wage-earner to have his condition improved by knocking down the tariff wall and deluging this country with American goods? Why should American factories build branches in Canada if they have free access to Canada if they have free access to the Canadian market? Free trade, or turers will go out of business, and their working like it would close half the anything like it, would close half the States factories in Canada and throw thousands and tens of thousands of Canadian workmen out of employment. Men want more than work, as our neighbor truly observes, but a man with a family out of a job will get little assistance from those "currents"

States.

I cannot quite follow your argument as to the Canadian paper dollar. My impression is that our dollar bill would be worth its face value if we had gold in our treasury to meet our paper when presented. If the dollar (paper) bill is worth only 85c over the border, has not the deficiency of gold here something to do with that depreciation?
