The treatment of deformed feet is one of the most interesting branches of Hospital work. These few photos are examples of many complete cures.

- Fig. 1. Represents a boy of 10 years, who was 4 months in the Hospital.
- Fig. 2. A boy of 8 years, who after 3 months in the Hospital now comes to the Out-door Department for occasional treatment.
- Fig. 3. A boy of 13 years, whose deformity was perfectly cured although it had existed from birth.
- Fig. 4. A boy of 7 years, who was 2 months in Hospital and left perfectly cured. There were two operations.
- Fig. 5. A boy of 4 years, who after 6 months' treatment left the Hospital with feet in a natural position.
- Fig. 6. A girl of 12 years, whose left foot was much deformed, was enabled, after treatment, to walk as straight as other girls.
- Fig. 7. A boy, is a case of both feet deformed, and shows well for the Orthopedic work of the Hospital. There were two operations.
- Fig. 8. A boy, whose case is similar to Fig. 7. There were two operations.
- Fig. 9. A boy, whose foot presents a peculiar deformity, which was successfully treated in the Hospital.
