

MUNROE RULE IS AMERICA FOR N. AMERICANS

Such is the View of Argentina Statesman Refuting Proposed League.

Buenos Ayres, Sept. 22.—The Monroe Doctrine is not a doctrine of "America for the Americas" but of "America for the North Americans," declared Dr. Lelio M. Moreno Quintana, an Argentine lawyer and a guardian of a former President of Argentina in an address recently before the law students of the University of Buenos Ayres in which he attacked the proposed league made by President Brum of Uruguay last April for the formation of an "American League."

President Brum's idea that the league should be based on a declaration of the Latin-American countries similar to the Monroe Doctrine which would place them on a footing of equality with the United States in maintaining the doctrine was asserted by Dr. Quintana. He told the students that the danger lay in "North American imperialism," for the Monroe Doctrine was an imperialist doctrine solely intended to maintain North American hegemony over the rest of the continent.

Safety of Latin Lands.

Dr. Quintana contended that the safety of Latin-American countries lay in the formation of a league exclusively among themselves, a Latin-American league of countries of the same origin, analogous customs, similar language and professing the same ideals and aspirations. It should be based "with the end of making their common interests and presenting a defensive bloc" against North American imperialism and against any European pretensions, though he believed the latter would be very remote.

The recognition of the Monroe Doctrine in Article 21 of the pact of the League of Nations was a matter, he said, upon whose consequences for them, all the Latin-American countries, ought to meditate profoundly. Although Dr. Brum's Pan-American concept was that of equality and fraternity among all the nations of the two continents, Dr. Quintana declared that any one who considered that the United States would pretend to treat the rest of the countries of America as equals and brothers was utopian.

U. S. Violations.

He cited what he called instances of the "continuing transgression of the Pan-American concept by the United States after the proclamation of the Monroe Doctrine," among them, "The successive intervention of Mexico," "the armed intervention of the United States with European countries when it collected the public debts of Yucatan," "the threat of military intervention in Honduras and the demand of the United States upon Colombia that it enact a law for the exclusion of petroleum on basis declared by the Yankee government," "the demand that Colombia should be deprived of its indemnity of \$25,000,000 voted by the North American parliament as compensation for an act of violence even the Yankee recognizes—the separation from Colombia of Panama." The latter instance, says Dr. Quintana, "well characterizes the imperialistic ambitions of the great republic of the North."

SAYS OUR TRADE IS ENCOURAGING

Wall Street Journal Makes Favorable Comment on Canadian Trade Conditions

New York, Sept. 22.—Discussing Canada's financial situation the Wall Street Journal says: "Viewed from almost any angle, the current condition of Canada's foreign trade compiled by the Canadian department of trade and commerce is encouraging. In both the results achieved in the year ended with July, 1920, and in the indicated accumulation of raw material for further trade expansion the figures in detail tell their own story."

After giving the figures on Canadian exports and declaring that the increased exports to the United States to Belgium and the steady, but aggressive expansion to other countries, shows Canada is making good the promise to her people to go after the new markets of new countries which

MAN HAS NEVER SEEN SPAWNING FRESH WATER EEL

Danish Professor Searching the Atlantic Now for a Specimen.

Cardiff, Wales, Sept. 22.—Dr. Johannes Schmidt, a Danish scientist, is searching the Atlantic between Azores and the West Indies for spawning fresh water eels, which the eye of man has never seen.

This announcement was made by Dr. W. A. Herdman, professor of zoogeography at Liverpool University, in his presidential address before the annual conference of the British Association.

"All the eels of the streams and lakes of northwestern Europe," Dr. Herdman said, "live and feed and grow under our eyes without reproducing their kind—no spawning eel has ever been seen. After living for years in immaturity, at last near the end of their lives the large male and female eels undergo a change in appearance and in nature. They acquire a silvery color and their eyes enlarge, and in this final state they commence the long journey which ends in maturity, reproduction and death."

"They migrate in the autumn to the coast, from the inland seas to the open ocean and still westward and south to the mid-Atlantic, and we know not how much farther, for the exact locality and manner of spawning have still to be discovered. The youngest known stages of the eels, the larval stage, of eels have been found by Dr. Schmidt to the west of the Azores, where the water is over 2,000 fathoms in depth. These were about one-third of an inch in length and were probably not long hatched. Now Dr. Schmidt is traversing the Atlantic in the hope of finding the missing link in the chain, the actual spawning fresh water eel, in this intermediate waters somewhere above the abysses of the open ocean."

The war would open, the paper continues: "There are victims of economic insomnia whose most horrible nightmare is an adverse trade balance. Twelve months Canadian trade to July 31, 1920, does show an adverse trade balance of \$29,471,111; but it does not show Canada's invisible balance, which from war and post-war credits abroad total at least a billion dollars, and now rapidly assumes the far-reaching advantage of permanent foreign investment—a weapon of almost unequalled strength to any exporting country."

Imports of exports of exports are \$25,000,000 higher than in 1918. Iron and steel, \$20,000,000, flax, hemp and jute \$6,000,000, wool \$4,000,000, silk \$24,000,000, raw sugar \$56,000,000, and hides and skins \$18,000,000.

Not dependent on wheat.

"Scrutiny of the export list proves that Canadian trade expansion is not absolutely dependent on sales of wheat and meat. Exports of wheat are \$120,000,000 less, and of meat \$57,000,000 less than in 1918. Meat exports have declined, and cheese once practically Ontario's sole European export has not held its own. Manufactures export in the current year go far to replace a trade formerly gone for good—exports of cartridges and explosives in two years have shrunk from \$900,000,000 to \$6,000,000.

"These figures are the first chapter in the tale of a new era of Canadian development."

Quit Tobacco

No-To-Bac has helped thousands to break the costly, nerve-shattering tobacco habit. Whenever you have a longing for a smoke or chew, just place a harmless No-To-Bac tablet in your mouth instead. All desire stops. Shortly the habit is completely broken, and you are better off mentally, physically, financially. It's so easy, so simple. Get a box of No-To-Bac and if it doesn't release you from all craving for tobacco in any form, your druggist will refund your money without question. No-To-Bac is made by the owners of Cigarettes; therefore it is thoroughly reliable.

WANTS UNIFORM PATENT MEDICINE LAW FOR DOMINION

Toronto, Sept. 22.—Owing to development of prohibition laws about the manufacture and sale of proprietary and patent medicines are needed, according to J. A. Stewart, M. P. for Lanark, who addressed the Ontario Retail Druggists' Association on the matter here this afternoon.

Uniform legislation was required, Mr. Stewart said, in order to deal with the sufficiency of medication in patent and proprietary medicine, so that the same law would be in force in every province. He recommended a reference of the matter to the Dominion Department of Health, which, he said, was the best equipped to deal with it.

ROYALTY IN RIO

Rio Janeiro, Sept. 22.—King Albert and Queen Elisabeth, of Belgium, the first King and Queen to visit any South American country, received a tremendous ovation when they landed on Brazilian soil this afternoon. The ovation was in honor of the entire population greeting the royal party.

Montreal, Sept. 22.—Pauline Fontaine, aged 2, whose parents are spending the summer at the Perrot, was fatally scalded last Sunday night when a platter containing boiling gravy was spilled over her. Mrs. Fontaine was entering the dining room from the kitchen with the child when the child bumped into her, causing the boiling contents of the platter to be spilled on her head.

MAINE NEWS

Sail at Usual Times

Montreal, Sept. 22.—In spite of the delayed arrivals, through fog, of the Canadian, Canadiana, and Canadiana 2 was announced today at the offices of the steamships concerned that all four liners will manage to sail on the dates originally scheduled for their next departure from this port. The Scotian and Tunkian will sail Friday, and the Canadian, Canadiana and Canadiana 2 on Saturday.

Port of Montreal, Sept. 22.—Arrival: Erika, Hamburg; Kossuth, Ferenc, Regio; Dunaff Head, Belfast; Monse, rums, London.

Departures: Canadiana Voyaguer, Cardiff; Ramore Head, Belfast.

Melita Due Saturday

Montreal, Sept. 22.—The C. P. O. S. Melita is expected to dock here Saturday. She carries 558 cabin and 1,420 third-class passengers.

BOSTON MAYOR THREATENED

Boston, Sept. 22.—A letter scrawled in red ink and warning Mayor Peters that "you will get your medicine next" was received by the Mayor yesterday. He treated it as a joke, but said he would turn it over to the police today. This is the third threatening letter received by Mayor Peters within a year.
