4,0000 MEN ARE DIGGING THE

PANAMA CANAL

A tenderfoot asked the other day what was the use of making such a fuss about tying knots; why should a thing like that be put in such an important place, and the person will then fall across the shoulders.

In the ease of heavy smoke, gas fumes etc., harness yourself on to the person with sheets or cords, and drag him out of the room along the floor, crawling on all-fours yourself. Practice this by tying a bowline tenderfoot's test.

If you look at the three things in the tender foot's test.

If you look at the three things in the tenderfoot's test, you will see that the first requires brains, to know the laws and signs; the second requires a right heart. Thus drag him out.

within the territory covered.

A series of these maps is being issued by the chief geographer of the department of the interior. Maps are being prepared in detail of the most important districts of the dominion, and the intention is to combine them as has been now done in the case of Prince Edward Island into large and complete maps of each of the provinces of Canada when all are finished. In the meantime, copies of the map of each district are being issued for the conveni-ence of the public as soon as the individual plates are completed.

self-reliance he is sent off on a two days journey by himself, or with only one other scout. On returning, he must write an intelligible report of things seen. Then he must know how to deal with various accidents—ice-breaking, electric shock, drowning, runaway carriage, and so on. He must prove that he can make a damper, cook a hunter's stew, skin and gook a rabbit, or pluck and cook a bird. He must read a map and draw sketch maps; use an axe map and draw sketch maps; use an axe as to constitute the different manner in which canadian municipalities prepare for a career of expansion. Generally growing pains are demonstrative. There are cherry parades like they have in certain parts of Nova Scotia, Bear River, for instance; Boost Clubs as in Regina and Moncton

pluck and cook a bird. He must read a map and draw sketch maps; use an axe for felling timber; and judge distance, area, size, numbers, height and weight within 25 per cent error. Finally, he must bring in a tenderfoot, trained by himself in the points to of temperament—certainly in Fredericton. In New Brunswick's capital the consisted for a tenderfoot badge.
