BEYOND JORDAN.

By J. H. COOPER.

And they came to him, mothers of Judah,
Dark-eyed and in splendor of hair,
Bearing down over shoulders of beauty,
And bosoms half hidden, half bare.

And they brought him their babes and brought
Half kneeling, with suppliant air,
To him the brown cherubs they brought to him,
With baby hands laid in their hair.

They reached him blinde he said, lower,
"Of such is My Kingdom," and then
Took the brown little babes in the holy
White hands of the Saviour of men.

Held them close to his heart and earnest them
Put his face down to theirs as in prayer,
Pat their heads to his neck, and so blessed them,
With baby hands laid in his hair.

NOTES AND NEWS.
GREAT BRITAIN.
A new bridge over the Thames at Wandsworth, has just been opened with imposing ceremonies. It is a toll bridge. They make paper in Scotland from hospital waste. It is recommended as particularly fine in quality and low in cost. Every year a number of soldiers are killed by falling from the celebrated castle in Edinburgh while attempting to desert at night.
Toronto is the name of the estate in England just purchased by the Marquis of Lorne. It is reputed to be worth two hundred thousand pounds sterling.
Iron steamship building is still active in Great Britain. A correspondent who has visited Glasgow writes that 400 iron steamers are being built at that port and Greenock.
In a short time adulterated milk will become an unknown thing in London. The police make it very unprofitable for the cheating dairymen, and they are severely punished whenever caught.
The newest club in London is called the "S.E. & C. It is designed for members of all scientific societies, and the club-house will have conversation and reading rooms, and the usual facilities for members.
Four years ago England imported from Australia 2500 worth of preserved meats, last year it was a million in value, and is expected to increase rapidly in amount as the practice against preserved meats wears off.
Not long ago two gentlemen started from London on a bicycle trip to "Land's End," a distance of 300 miles. Their trip occupied them just one week. They were forty-two hours and twenty-five minutes actually upon their wheels. On their journey they created quite a sensation.

GENERAL.
The burglar Jimmy is a curious boy; he is always prying into other people's business.
The abolition of the gambling tables in Baden Baden has caused a falling off of 50,000 in the number of annual visitors.
While witnessing a game of base ball out West, a boy was struck on the head by the ball coming out of his mouth.
A Frenchman has invented a boot with wheels which, he says, will enable the wearer to go considerably faster than a horse.
It is reported that silver mines, yielding 90 per cent of pure silver, have been discovered near Copiapo in Chili. The fortune hunters are speaking thickly in large numbers.
The fortifications of France are to be carried on to a very extensive scale, complete and lasting. The work goes on night and day and guards prevent curious people from inspecting the progress of the work.
A benevolent individual in St. Paul has insured his life for \$10,000, payable to Y. M. C. A. of that city. The directors of the association say they wish the man no harm, but that they would like to have that \$10,000.
The "Nursery" presents its November number, full of good things, charming and amusing, "for the youngest readers." Its big type, pleasant stories and exquisite pictures make little readers happy, and we pity those who have never seen it.
To prove that Pacific stock sold hard, Mr. H. D. Cooke says that his brother gave him forty shares some time since, promising him if he succeeded that he would give one hundred dollars to the Young Men's Christian Association. He failed to sell one share.
A scandal growing out of a divorce case is just now attracting wide attention in India. Col. Hoag has been suspended from office and is called upon to explain his conduct in taking advantage of his official position, as Director-General of the Post Office in Bengal, to abstract a letter written by his wife to a gentleman friend while passing through the post.
The American forger in London has been succeeded by the American thief in Paris. A dealer in diamonds named Peak went in to meet a customer, and while signing a receipt for a sale of 500 francs saw his carpet-bag standing beside him. It was afterward found in a room at the Grand Hotel, cut open and empty. The room had been vacated by an American, who is now very much wanted by the police. The value of the diamonds stolen was over 400,000 francs.
A Modern Martyr.
When, only a few weeks ago, the abhor was raging in the slums of Berlin, a young physician, scarcely past his thirtieth year, made himself remarked by the boldness and persistency with which he entered the infected quarters, and the apparent recklessness with which he exposed himself to the contagion. It is worth while that his name should be recorded and well remembered; it was Otto Obermeyer. He had another object besides that

of relieving and, if possible, curing, the poor creatures whom he visited; he proposed to himself to investigate, in the presence of the living pestilence itself, its causes and its development. At last, the brave young soul conceived that he had discovered the clue; and, with a heroism as much greater than the heroism of the battlefield as it is nobler to destroy one's self to save men than to desert oneself, he resolved to test his discovery upon himself. It was an awful experiment; Obermeyer knew full well that he staked his life against the hope of conquering the cholera. Obtaining from one of his patients some of the deadly cholera germs, he went deliberately into his room, placed a table with pencil and paper at his bedside, lay calmly down upon the bed, opened a vein in his arm, and inserted the deadly poison. He thought he had discovered how to neutralize it; if so, he was master of the pestilence forever more. But he was wrong, and the error was fatal. He lived seven hours, and then died; but during those seven dying hours the young hero observed with scientific exactness, the effects and progress of the disease upon him, and one after another he noted his observations down until within the very hour when the spirit left the body. These notes are pronounced to have the highest value, and will serve the commission with new facts of the greatest importance; and so the dying legacy of Otto Obermeyer, after leading to the victory which he condemned himself to self-destruction in trying to achieve.

Two Years for Fraudulent Voting.
The perpetration of fraud at the polls has just received such a terrible rebuke in Montreal as will tend very materially to the discouragement in that region of that meanest of thes, the stealing of other men's rights. Every man who votes illegally robs people of their right to a fair expression of public opinion on matters of public interest. This kind of robbery, committed by a man named O'Brien at the recent election in Montreal, secured for his perpetrator on Friday last a sentence of two years in the penitentiary. Persuading a decent man at the polls has made O'Brien a dead man so far as politics are concerned for a period which will include at least two elections, and the public will be the better for the sentence, which will also tend to discourage a number of places, and a few bold stuffed and election swindlers in every corner where a vote is counted more than once, the effect would probably be wholesome, keeping some rogues out of office and placing others behind the bars.

The Newfoundland Fishermen.
A letter from St. John's, N. F., says that Merchants, fishermen and traders are jubilant over the splendid success of the fisheries this season. To a most productive seal fishery in spring has been added the best cod, salmon and herring fishery which the country has seen for twenty years. The catch of cod on Labrador has been above an average, and herring have been taken in immense quantities. The shore fishery has been excellent. The summer was fine and favorable for the cure of fish, and the fall so far, has been delightful. The price of fish is still high, being nearly double that of a year ago. Men are so scarce at St. John's that women are employed to unload the fishing vessels.
