Adams was highly commended. Display of musical instruments-Diploma o D. J. Robertson. Display of jewelry-Diploma to J. O. fused to undergo an examination by three Patenaude Display of electric light and gas fixtures today for that purpose.

abating to some extent, but the loss to the hatcheries on these rivers is irreparable as it is doubtful if there will be even fair run of late sock eye salmon to the pawnng grounds. The fences on streams near Harrson lake which were swept out by the high water berated nearly 6000 sock eyes that had been penned to allow them to ripen for spawning. The fish were not in a fit con dition to spawn when the freshet struck the fences and those that were ripe passed up the streams while the freshets were on and the fences many feet under water The hatchery managers have done everything in their power to secure sufficient ributaries is perfectly empty. At Grante creek a dominion government hatchery,

ova to commence the season, as this time last year millions of eggs were in the troughs of all the hatcheries, while this year every hatchery on the Fraser or its farther inland, beyond the reach of the recent freshet, about 40,000 eggs have been secured and are now under propagation. methods. On the late run of sock eyes aloné depends the success or artificial pro-pogation of the sock eye salmon in the hatcheries in the south of the province. as at present not a hundred fish have been captured, which portends a poor outlook for the hatchery output for 1907. WONT BE INSANE

New York, Sept 19-Harry K. Thaw, who s a prisoner in the Tombs awaiting triat on the charge of murdering White, realienists whom his counsel took to him. Ymir 0

Dplomas were also recommended for the lisplays of mining machinery by Messrs. Isaac and Hinton; electrical machinery by the Allis-Chalmers-Bullock-Ltd., and soap by A. Austin of the Golden West Works

of Calgary.

Strike at the Sullivan a Feature of the Past Week-Deep Mining is Now the Fashion in Ressland

One of the features of the past week i mining circles has been an authenticated strike in the workings of the Sullivan mine at Marysville and a consequent advance of the shares on the stock market. No details are forthcoming but it is an-nounced that the tonnage at the smeller will be considerably increased, probably

to about 750 tons a week. At every smelter in south eastern Brit-ish Columbia extensive enlargements of the plants are in progress at the present time. Locally the Hall Mining & Smelting company have been compelled to ask their customers to hold their shipments for a short time to enable the smelter nanagement to complete alterations and management to complete attentions and repairs in progress, the smelter being unable to treat the ore unitil the im-provements are finished. For this rea-son the receipts at this plant for the past

At the Consolidated smelter at Trail At the Consolidated smelter at Train the extensive additions and alterations that have been in progress for some months are nearly complete, and the plant will shortly have a greatly increas-ed capacity. At the Granby smelter and at the B. C. Copper company's plant a state to company is now nearly

undertaken, and the fact of the prepar-ations, now nearly completed at differ-ent points, for the treatment of such an Increased tonnage demonstrates very forcibly the advance being maintained in the mining industry all over the south eastern portion of the province. Good grade shipping ore has been found in the lower levels of the Centre Star and it has been decided to go deeper still, following the lead of the LeRoi in this respect. It is stated that the Jumbo mine at Rossland is out of ore but that the manager contemplates going down after the one body, the good work on the Le Roi at depth giving confidence to the Jumbo people to follow suit. The output of the various mines and the

receipts at the several smelters for the past week and year to date in detail, are

HOLY ROLLER MURDERS

MAUD CREFFIELD SAYS SHE IS ANXIOUS TO HANG.

HUSBAND'S SPIRIT TOLD HER TO AVENGE HIS DEATH.

Seattle, Sept. 19 .- "I am anxious to pay the penalty of the law. I would be glad to give up my life for taking George Mitchell's life. I have fulfilled the purpose for which God placed me in this world, and I care not what happens to

This is the statement made by Mrs. Maud Hurt Creffield to the medical com-mission that is enquiring into her sanity. The statement was in answer to a question as to whether she was willing to undergo capital punishment for her crime. The examination of Mrs. Cref-field was searching and exhaustive and related to her reasons for committing the crime. Mrs. Creffield testified that after the

at the B. C. Copper company's plant a large increased capacity is now nearly arranged for. Before the end of the year the tonnage from the combined districts will have reached a figure thought most improbable, even 12 months ago. Unless the various smelter managers were convinced that plenty of ore would be forthcoming no such elaborate enlargements of plants would have been undertaken, and the fact of the prepar-

telling me that it was his wish as well as that of God that I should avenge his death. I knew that if I were to fulfill the word of God that I would be subject-ed to the penalty of man's law. But then I never consider the laws of men when the will of God has been made known to me." After this statement the medical com

mission enquired if she had been com-manded by God to kill George Mitchell, why she let Esther Mitchell do the slaying. She said: "Until two days be-fore the killing I intended to do it. knowing it was God's will that I should do so. At that time Esther came to me and said that God had made known to her that it was his will that she should kill her brother George. Both of us had been in a state of prayer. I did not be-lieve her. I was certain that it was God's will that I should do the killing. However, both of us again entered into a state of prayer and it was witnesseth to me that Esther was correct that it was God's will that she should do the killing." knowing it was God's will that I sho

was God's will that she should do the killing." When Dr. Turner pointed out to her that the statements she was making to the commission were quite at variance with those made at police headquarters after her arrect she admitted that it was so. She was handed a stenographic re-port of her confession to the police, but she refused to read it saying: "I know what is there." She said that before the killing she and Esther Mitchell had agreed to make the statement taken down by the police. She declared her reason for this was because she was sat-isfied that the public would laugh at her religious motive and "mock and scoff at it." coff at it."

Since her incarceration she declared that God had made it known to her that she would make public the true mo-tive of her act regardless of consequences. Mrs. Creffield stated that if she had not been a part to the killing that her life would have been a failure and that are and that she would be unhappy at not having fulfilled her divine mission on earth.

When asked whether the killing of When asked whether the killing of Mitchell had made her happy she said: "I am satisfied; I am certain that is have fulfilled God's will. I was not happy. I am never happy. I care nothing for happiness on earth. I simply wish to do God's will." "Mrs. Creffield, speaking of Esther's desire to commit the crime said: "Es-

desire to commit the crime, said: "Es-ther told me that God had made it known to her that the reason she had known to her that the reason she had been spared was to do the killing. She said that she had hever suffered the persecution that the others of the flock had suffered for the sake of the religion and that God had made it known to her that the time had arrived for her to do her part."

OVERSEAS MAIL ON TIME.

Brandon, Man., Sept. 19.—The C. P. R. Overseas Mail arrived here sharp on the originally scheduled time, the last run of 132 miles from Broadview, having been made in 150 minutes. Brandon is 1349 miles from Vancouver and the distance has been covered in practicall hours, although over 500 miles of the route lay through the mountains.

SWEPT FROM THE DECK

Swept FROM The Dick Nortolk, Va., Sept. 19-Captain T. J. Ad-ams and three sailors were swept from the decks of the British tramp steamer Laura, which arrived here today, in the storm which ravaged the coast last Monday. The men who were lost were in the chart-The men who were lost were in the chart-house when a great wave carried the house away. Fred Gladstone, the second officer, was carried from his bunk, where he lay ill with a fever, to the deck, where he urected the work of saving the ship. All the members of the crew are bruised from their awful experien
