and insects of various kinds, which they
secure in summer of their own accord.
They eat this animal food because it is
good for them. Nature demands it. If
we are to get the best results from our
fowls, we must follow nature's method
as nearly as possible. We must supply
this natural food. The cheapest animal
food that you can give your fowls is
fresh cut green bone, meaning scrap bone
with meat adhering, which can be ob-
tained from any butcher. This is ad-
mitted to be the best thing that can be
given young chicks to force their growth,
and to hens to increase egg yield. The
truth is that no one who raises poultry
(on a large or small scale) can afford to
do without a good bone cutter. Poultry
also makes a good combination with
fruit growing or market gardening.
Upon the fruit farm fowls are of advan-
tage. They keep down the insect pest,
and they may have free range the
greater part of the season without the
possibility of doing any damage. Plum
growers have found poultry especially
helpful in keeping down the culicid,
and even apples have been considerably
benefited. The waste fruits, either in
winter or summer, are a welcome and
valuable addition to the poultry ration.
The market garden also furnishes a
large amount of waste products which
may be utilized for poultry feed. There
is the waste lettuce, the small heads of
cabbage, the unsold beets, carrots, and
potatoes, the peas and corn which can
not be marketed all serve to make a
variety in the fowl's ration and will
bring good returns in eggs. Dairymen
who have town or city milk routes, and
market gardeners who retail their pro-
duce, have exceptional opportunities for
marketing fresh eggs and poultry at the
highest prices. They should by all
means make the most of this advantage,
for any class of agricultural producers
who can reach the consumer without the
intervention of the middleman is indeed
fortunate.

Experienced poultrymen know that in
order to get eggs in the fall and early

winter from pullets, the chicks must be
hatched in March and April with the
large breeds, and as early as May or
first part of June with the small breeds
for the very simple reason that chicks
hatched later will not be old enough to
lay at the desired time. As it is seldom
that hens become broody in numbers un-
til after April, therefore an incubator
becomes practically a necessity. It is
also a necessity where one is keeping the
non-sitting varieties. By the invention
of artificial methods, we are accom-
plishing something which seems entire-
ly contrary to nature—the bringing out
of chicks at a season of the year when
there is not the least desire in the hen
to become broody. Furthermore, we can
now conduct the business on a whole-
sale plan, hatching and rearing thousands
in a season, where heretofore we had to
content ourselves with a few hundred.
This is the modern method of raising
chickens in any numbers, and the poul-
tryman who tries to do it in any other
way cannot hope to compete with those
who adopt up-to-date methods. There
are so many good makes of incubators
on the market that it is a hard matter
to make any recommendation at all.
The same remarks will apply to the
brooder. The chick can find it when
cold, is able to get under its roof when
the rain comes, and it never lets the
chick cry "peep peep," because it is busy
scratching for a worm or chasing an in-
sect. Give me a good incubator and a
well made brooder as an important part
of the poultry farm.

A Cure for Rheumatism.—A painful and per-
sistent form of rheumatism is caused by impurities
in the blood, the result of defective action of the
liver and kidneys. The blood becomes tainted
by the introduction of uric acid, which causes much
pain in the tissues and in the joints. Parmelee's
Vegetable Pills are known to have effected many
remarkable cures, and their use is strongly recom-
mended. A trial of them will convince anyone
of their value.

Kendall's Spavin Cure

The cure that
saves horsemen and
farmers millions of
dollars every year.

It is known the
world over as the
one certain, reliable
remedy for Spavin,
Curb, Splint, Ring-
bone, Bony Growths
and any Lameness.

Cases just devel-
oping and old, stub-
born sores and
swellings readily
yield to the wonderful curative
powers of this famous remedy.

Orangeville, Ont., Dec. 21, '08

"We had a horse which was
getting very lame on account of a
Spavin. I was anxious about him
as we could not work the beast
when we most needed him."

Our teamster saw Kendall's
Spavin Cure in the store and
tried it.

I am pleased to say he had
success as the horse has stopped
limping and is doing his day's
work."

W. A. NICHOLSON.

Don't worry about Spavins,
Growths, Swellings or Lameness,
but use Kendall's Spavin Cure.
It cures every time. The world's
best liniment for man and beast.

General Agents

Bog Spavin

Cure the lameness and
remove the bunch without scarring the
horse—have the part looking just as it did
before the blemish came.

Fleming's Spavin Cure (Liquid)
is a special remedy for soft and semi-solid
blemishes—Bog Spavin, Thoroughpin,
Splint, Curb, Capped Hock, etc. It is neither
a liniment nor a simple blister, but a remedy
unlike any other—doesn't irritate and can't
be imitated. Easy to use, only a little re-
quired, and your money back if it ever fails.

Fleming's Vest-Pocket

Veterinary Adviser

describes and illustrates all kinds of blem-
ishes and gives you the information you
ought to have before ordering or buying any
kind of a remedy. Mailed free if you write.
