

symptom of fever is 'red cheeks,' but no sensible person ever thinks of doctoring red cheeks! When the fever which causes them is cured the red cheeks will soon disappear. Pain in the head, dizziness, impaired memory, noises in the head, specks floating before the eyes, bad taste in the mouth, morbid appetite, pain in the shoulders, side, breast, spine and abdomen, palpitation of the heart, short breath, cold hands and feet, irritable kidneys, torpor of the liver, constipation, rusty skin, sallow complexion, neuralgia and rheumatism are as much symptoms of the disease of the organs of digestion and nutrition, as red cheeks are of fever." He goes on to say that people commonly endeavor to treat the *symptoms* instead of the *disease* which causes them, and for that reason could not cure either. DR. WILSON'S ANTI-BILIOUS AND PRESERVING PILLS on the contrary, as has been shown, attacks the disease in its citadel and through one fell stroke all the symptoms disappear as if by magic.

FEVERS,

which are commonly caused by blood poisons through the quantity of impure matter in the arteries and veins usually are got rid of by the use of DR. WILSON'S ANTI-BILIOUS AND PRESERVING PILLS, as is the case with diseases more clearly connected with the nutritive or digestive organs.

IN FEMALE DISEASES

DR. WILSON'S ANTI-BILIOUS AND PRESERVING PILLS are of great service and may be safely trusted. By them irregularities are corrected, stoppages relieved and leucorrhoea or whites cured. At the turn of life they are especially useful, and by their use many chronic diseases, which at this period so readily seize on the system, are prevented.

RHEUMATISM, GOUT, LUMBAGO, RHEUMATIC FEVER and other diseases caused through foul secretions of the stomach and bowels, and a diseased state of the blood, are assisted in their cure by DR. WILSON'S ANTI-BILIOUS AND PRESERVING PILLS. They penetrate to the fountains of the blood and render it pure from its source.

THE WONDERFUL SUCCESS

of these pills has shown us clearly that they are an article of public necessity and a public boon, and their ever-growing reputation has induced us, more closely than ever to guard against any decline in quality or efficiency, so that year after

year, as they become even more largely and favourably known, the good done by them may increase in a proportionate degree.

LIVER COMPLAINT CURED.

EEL RIVER, N.B., June 11, 1880.

SIR,—I can hardly express my gratitude for the benefit my daughter has received from DR. WILSON'S ANTI-BILIOUS AND PRESERVING PILLS. The physicians had given up all hopes of curing her of what they called Liver Complaint, and she had become melancholy and unhappy, and her constitution was much broken down by the use of mercury. She tried your pills, and improved; persevered in their use, and now has recovered.

W. T. COBB.

A BOX WORTH FIFTY DOLLARS.

CARLETON, Dec. 22, 1879.

Mr. J. W. Brayley:

SIR,—For more than four years I have used DR. WILSON'S ANTI-BILIOUS AND PRESERVING PILLS in my own family, and little or nothing else, and I have no doubt they have saved me many a trip to a physician. I also have recommended them to many afflicted with headache and bilious derangement, and given them to many persons around me invariably with good results. A friend of mine after some experience once said to me: "If I was travelling, and had but one box of pills and could not get another, I would not part with it for fifty dollars." He was right. In my opinion there is no equal to them.

HENRY G. CASEY.

A PREVENTIVE REMEDY.

HILLSBOROUGH, Oct. 26, 1878.

Mr. J. W. Brayley:

SIR,—Your pills relieved me from sick headache, accompanied by costiveness and tremor, to which I was subject for about fifteen years. After five years use in our family, and from the enquiries made for them by others, they seem to be the only medicine the people require. I believe that, if taken in time and properly used, they would supersede the use of almost every other medicine. During the five years we have used the pills in my family we have been visited by several epidemics, such as Diphtheria, Influenza, Scarlet Fever, Measles, &c., from which we all happily escaped, and give the credit to DR. WILSON'S ANTI-BILIOUS PILLS.

W. S. HOPKINS.
