## Easy to Build a Telephone System

THE Ontario Telephone Act makes it comparatively easy for rural municipalities to go into the telephone business. Nearly all the Municipal Systems started in Ontario during the last nine months have been in touch with us, and after considering competitive tenders have placed their orders with us for everything from poles and cross arms to telephones and switchboards. Our experience will therefore be of assistance, and is at the service of those who desire to start a system, whether municipal or local, under conditions that will mean success.

THE telephone business is our EXCLUSIVE business. The INDEPENDENT Local and Municipal Systems are our only customers. We are therefore directly interested in their success, and heartily cooperate with them for our mutual benefit. We are manufacturing the highest-class telephones and equipment. Everything guaranteed. If your locality is without a telephone system, now is the time to get busy. During December, January and February plans can be perfected for commencing work in the spring. Write for our No. 3 Bulletin.
