DEVELOPMENT WORK PROGRESS ING ON THE ORO DENORO.

Work on the Seattle Will be Resumed.

250 feet north of the place where they had previously opened up a large body of shipping ore, thus indicating that the vein or a series of parallel veins have great width. As ore was found everywhere between these two cuts, Ross Thompson, president of the company, put a force of president of the company, put a force of the largest of the company out the ore where drift will show a great paying width of

During his recent visit here Smith Cur dary country. Pathfinder mountain and found a marked straightening up, and is now cutting regularly across the tunnel, disclosing good stringers of quartz. Mr. Curtis awarded to A. C. Hagelberg a contract for extending the tunnel an additional 50 feet.

The gang of men set to work a fortnight ago to strip the ledge on the Kitty W. on Pathfinder mountain struck clean ore at a depth of two feet on Friday. The cropping is about 350 feet wide and the claim and a portion of the

Kitty W. fraction. Work on the Seattle, a north fork property, which is considered to possess the best surface showings in the Boundary, was started a few years ago. The owner-ship of the claim has been in dispute for several years past, and now the various litigants have agreed to have it developed. Options have been secured from all the parties. Alex Miller, local manager of the Merchants' Bank of Halifax, will act as trustee. If the development work planned produces the results that are anticipated, a sale at a high figure will like ly be negotiated. The Seattle was locatby Robert Clark, one of the litigants. It has a ledge varying in width from 50 to 350 feet wide. Various open cuts are in ore. The contract for the work just commenced has been awarded to W. McKay of Grand Forks,

Grand Forks, B. C., Sept. 19.—(Special.) -S. I. Simpson, D. G. Beaty of Montreal, who came west with the members of the Canadian Mining Institute, are making a tour of the Boundary country. They inspected the smelter and afterwards proceeded to Camp McKinney. Mr. Simpson is the manager of the James Cooper Manufacturing company, Montreal. George m of Cripple Creek, Col., is a mem-

ber of the party.

Work will be started m a few days on the construction of the railway spur to Mayor the smeller. In addition there will be Guire, will be used for the purpose of delivering fuel. The total cost is estimated at \$100,-000. The smelter company has already ordered 650 tons of machinery. Two car loads have already arrived.

Two hundred and fifty tons of machinery for the Mountain Lion mill at Reputer from the best of the shaft sunk on the lic is beginning to arrive here by rail. It connect with the shaft sunk on the connect with the connect with the shaft sunk on the connect with t treated by stamps and cyanide, known as the combination process. The Republic mine will shortly begin the shipment of 30 tons of ore daily from Grand Forks to

that section is destined to be a great mining country. It is reached from Rock creek by trail, but the provincial government is now building a wagon road into the district, and the C. P. R. has already made two surveys theoryth it Power the Dragonius. He said that he had been greatly impressed with the vast based with the vast based with the vast based with the says of his new employers. He said that he had been greatly impressed with the vast based with the vas made two surveys through it. Beaver the Dunsmuirs.

Maurice J. O'Connor, the locator of Maurice J. O'Connor, the locator of th creek valley is three-quarters of a mile wide. The soil is fertile, bunch grass being abundant everywhere, and every foot the Kettle river, returned yesterday from

ing porphory, with diorite on the other, and as a rule there are good walls with separating veins of talc. The ore consists of regular gold quartz carrying some iron and galena, with small values in copper.

Mr. A. B. Buckworth, J. P. of Ymir, is in the city looking up old friends. He says he is much pleased at the prospect of a settlement of the trouble over the another, all lying contiguous, however.

mouth. This creek flows into the Kettle river about 55 miles from Rock creek, dealer from Phoenix, B. C., was held up and almost directly north of that place. The claims are about 60 miles from Chesaw. Mr. Hughes arrived in Chesaw Greenwood, whence they are reached by a trail. A survey for a railway has been merous friends, proceeded in the usual mede as far as Canyon creek, about 20 western style to celebrate. The celebra Patninger mountain and toll driven to improvement in the tunnel driven to crosscut the vein. The formation 15 At a distance of 100 feet from No. 1

At a distance of 100 feet from No. 1

At a distance of 100 feet from No. 1 At a distance of 100 feet from No. 1 is level and easy grade could be obtained, it will doubtless in the future be continuabout six feet in width. One hundred

> and a half feet of clean ore, and for a distance of 400 feet further the vein has been carefully prospected and stripped. For 1,700 feet further it is clearly shown and defined by its outcroppings.
>
> There are now 1,000 tons of ore on the dump, averaging \$14.50 per ton. The amount of ore in sight in the mine is estimated at 15,000 tons.
>
> There is a good water-right, sufficient to the control of the entire width pits have been dug, and invariably have uncovered copper and a half feet of clean ore, and for a distance of granite formation, through which is in a northerly and southerly direction a dyke of porphory. Lying between this dyke and the granite is a ledge of miner alized rock, the surface or croppings of which appear to be a limey quartz, extending for about 400 feet in width. Through this cropping in several places for the entire width pits have been dug, and invariably have uncovered copper and invariably have uncovered opyrites or bornite at the depth of wo to four feet. One shaft has been sunk about eight feet, and some excellent ornite had been obtained from which the following assays have been received: From two feet depth, five per cent copper, trace of gold; average assay at four feet depth, eight per cent copper and \$1 in gold; average assay at bottom of the shaft, 39 per cent copper, \$1.80 silver, and \$1.50 in gold. Another party sampled the ore dump and received 24.6 p. c. copper and \$1 in gold. An assay from the richer appearing rock ran 40 per cent copper

and \$3 in gold.

"As one side of the ledge is a precipitous bank descending to the river for over 250 feet an excellent tunnel site is obtain. ed from which more than 100 feet of

depth will result.

"Judging from surface showings the property is the most promising I have seen in the entire country, and has been reported upon favorably by Lonald Harrian M. F. and J. Edwards Leckie of ris, M. E., and J. Edwards Leckie of Greenwood, who took the second and third assay mentioned in this statement. From surface indications I believe the property is the making of a mine, and from the presence of chalcopyrites among the bornite I feel more assured that the ore exists in large bodies, and if the high

the vein is an open cut 54 feet across the vein, all in ore.

On the Twins there is a 72-foot shaft sunk close to the hanging wall and 56 feet east there is a 50-foot shaft on the foot wall in ore. A crosscut is being run from the bottom of the latter shaft to connect with the shaft sunk on the hanging wall; besides there are several open guts in the Twins from 10 to 40 feet long. Forks, and now the tramway is being put in to ship continuously as completed and the railway is in. The shaft is down 80 feet and when the 100-foot level is reached drifting will be begun. The extraor

dinary values obtained at the surface are continuing, and the vein widening. The secretary of the board of trade has received word from the government at Victoria that work on the road from Greenwood to White's camp would be started at once, and that \$1,500 would be set apart for the purpose. The citizens of Greenwood will contribute a like amount.

Greenwood, B. C., Sept. 17.—(Special.)

## MR. HUGH SUTHERLAND IN TOWN

THE MANAGING DIRECTOR OF THE DOMINION COPPER COMPANY.

Mr. Hugh Sutherland of Winnipeg and

The Consolidated Properties Now Owned by the Company at Phoenix Camp-Mr. Sutherland's Views.

Toronto, was in the camp for the past two days, and Wednesday morning for Phoenix camp, in the Boundary Creek country. Mr. Sutherland is no stranger to Rossland, having been here repeatedly during the past two or three years. He has been engaged during a portion of that time in managing a group of mines in the Boundary country, at what is now known as Phoenix camp. The properties in question consist of six claims, known as the Idaho, Brooklyn, Standard, Stemwinder, Montezuma and Rawhide, the five first named being grouped together, and the last mentioned property being separated only by a claim or two from main group. All of these properties have been acquired by the Dominion Copper company, limited, a concern having its executive office in Toronto and its registered head office in this province at Vancouver. Its charter is a provincial one, with a non-personal liability clause as to its shareholders. Mr. Sutherland is the managing director of the company, Hon. Geo. A. Cox being the president, and Messrs. Wm. Mackenzie, Donald D. Mann and J. W. Flavelle, the latter of Toronto, being the vice-presidents. The capitalization is \$5,000,000 in \$1 shares, of which \$2,500,000 is held in reserve for treasury purposes. None of the stock has so far being offered on the market but has been privately taken up.

The company is regarded as one of the

most important consolidations of copper-gold properties that has been brought under one management in British Columbia.

Mr. Frank Robbins, M. E., formerly manager of the Eureka Consolidated Mining & Smelting company, Nevada, and the Elkhorn Mining company of Leadville, is the general manager. ville, is the general manager. Mr. Robbins, who is a pretty constant visitor in this camp, in a recent report about the properties now held by the company, The Brooklyn is well equipped with

machinery. The ledge is traceable the full length of the claim. At the 150-foot level a crosscut to the hanging wall shows the ledge to be 100 feet wide. The deepest shaft is about 260 feet, all in ore except tain, by W. Griswold.

The Olympia, on Emerald mountain, by driven 86 feet on the vein. entirely in orc. The Walla Walla, on Norway mountain, by W. Griswold.
