

## TRIED EVERYTHING WITHOUT RELIEF

Until I took "Fruit-a-tives"

SARNIA, Ont., Feb. 5th, 1910.  
"I have been a sufferer for the past 25 years with Constipation, Indigestion and Catarrh of the Stomach. I tried many remedies and many doctors but derived no benefit whatever.

Finally, I read an advertisement of "Fruit-a-tives". I decided to give "Fruit-a-tives" a trial and found they did exactly what was claimed for them.

I have now taken "Fruit-a-tives" for some months and find that they are the only remedy that does me good.

I have recommended "Fruit-a-tives" to a great many of my friends and I cannot praise these fruit tablets too highly."  
PAUL J. JONES

"Fruit-a-tives" is the only natural cure for Constipation and Stomach Trouble, because it is the only medicine in the world that is made of fruit juices and valuable tonics. Hundreds of people have been cured, as if by miracle, by taking "Fruit-a-tives", the famous fruit medicine.  
50c. a box, 6 for \$2.50, trial size, 25c. At dealers, or sent on receipt of price by Fruit-a-tives Limited, Ottawa.

## CAMPBELLTON SAYS FAREWELL TO THE M'LELLAN CUP

Beaten by Truro In Close Game By 8 shots

Campbellton Graphic  
Truro curlers came and saw and "snaffled" the cup. We entertained three rinks of the Nova Scotians who played one rink on Wednesday afternoon and two rinks in the evening. After successfully defending the cup against Moncton and Amherst we fell down and received a nasty jar and Truro have taken away a lovely one. The games were fought out in a good spirit with O'Keefe having all the strings and arrows of an outrageous fortune, losing end after end by the proverbial hair breadth. The biggest crowd so far turned out to watch the games, and it was with very mixed feelings we viewed the final results.

### LITERATURE AND SCIENCE

Although Canada cannot be said to have a very large number of men who have achieved distinction in the world of literature, yet there are a few who have attained this honour, and of whom she has every reason to be proud. Among this number is Sir Gilbert Parker, Kt., D.C.L., M.P., who

SIR JAMES GRANT

is a native of Belleville, Ont. He began his career by doing newspaper work in Australia. He has travelled very extensively, and has written many books, the best known of which are "The Seats of the Mighty", "The Right of Way" and the "Trail of the Sword". He is now living in England.  
Sir James MacPherson Lemoine, Kt., D.C.L., F.R.S.C., was born in Quebec in 1825. He is best known through his scientific and other publications, among which are "Maple Leaves" (6 Vols.), "Quebec Past and Present", "L'Ornithologie du Canada". He was President of the Royal Society of Canada for some time.

Sir James Alexander Grant, K.C., M.G., M.D., F.R.S.C., who while in politics introduced the Pacific Railway Bill, is principally distinguished for his medical and scientific work. He has published works on Organic Heart Disease, and numerous essays

SIR GILBERT PARKER

on various medical and scientific subjects. He was President of the Royal Society of Canada in 1903. Prominent as a philanthropist is Sir William Christopher Macdonald, Kt. He is a Governor of McGill University, and of the Montreal General Hospital, to the former of which he has given large endowments. He has established and endowed the Macdonald Agricultural College at Ste. Anne de Bellevue, at a cost of \$5,000,000.

### The Canadian Mint.

The place where money is made or what is perhaps more accurate where it is created has always appealed as most seemingly mysterious things do to the general reader. In Canada the Mint is located on Sussex Street at Ottawa. Here are made our gold and silver coins—the real money of the country. The paper medium of exchange is in the hands of the engraving firms and one does not see any trace of it in the Sussex Street establishment.

The Mint is open to visitors after certain formalities have been complied with. The essence of these, as with every thing connected with the institution is punctuality. Unless the workman arrives exactly on time he finds himself locked out. It is necessary for him to telephone in and get a written order, before he is allowed to enter. Prior to the worker beginning his day he must change his clothes, put them in a locker which is locked and contain special garments supplied by the Mint. He is not allowed to leave for dinner, therefore the department has a kitchen of its own, which supplies the midday meal to the staff. The metal to be used for the day's work is weighed out in the morning and no employee of the Mint is allowed to leave the building until the weight of the coins made up the material left over tally exact with the weight of gold and silver used out in the morning. Aside from all this, each member of the staff is locked in his or her department and is not permitted, even in case of illness to leave without a written permit. This, in the Mint where chances for dishonesty are reduced to a minimum.

The concluding process of weighing and automatically packing the coins into packages, requires the most finely adjusted machinery of all.

In this department is a scale so delicate that it had to be mounted on a concrete pier, sunk in the ground down to bedrock.

This machine automatically weighs the coins, throwing them into three different compartments, to the centre go, the perfect ones, those under or overweight are deflected to the other

### FORTIFYING SWISS TUNNEL

Italy and Switzerland fortify Simplon Tunnel.

Both Italy and Switzerland are taking measures to fortify the entrances of the Simplon Tunnel, while in the tunnel itself engineers are engaged in constructing mines and strengthening those already in place, in order to be able to blow it up at a moment's notice in the event of war. Near the middle of the tunnel, a few yards from the Swiss frontier, Italian engineers have put in place a double iron door that can resist the rush of an express train travelling at the rate of sixty miles an hour. This iron door is worked by electricity from Iselle, the station at the Italian end of the tunnel, and under ordinary conditions it is hidden in the rocky side of the tunnel. The door is carefully tested once a week. The mines are connected with Brigue and Iselle by electric devices, so that, by the mere pressure of a button, the Simplon Tunnel could be destroyed in a second.

### In The Name of Charity.

Nearly all the giddy youth of the neighborhood attended the charity bazaar, and one by one they drifted to a stall where a tiny, shapely, scented, gray kid glove reposed on a satin cushion. Attached to the cushion was a notice written in a delicate feminine hand, which ran:  
"The owner of this glove will, at 7:30 this evening, be pleased to kiss any person who purchases a twenty-five cent ticket beforehand."

Tickets were purchased by the score, and at 7:30 a long row of sheepish, not to say doggish, young bloods, assembled outside the stall. Then, punctual to the moment, old Tom Forson, the local pork-butcher, who weighs two hundred and twenty pounds, and is almost as beautiful as a side of bacon, stepped to the front of the stall.

"Now, young gents," he said, in his best "Buy, buy, buy," tones, "this ere glove belongs to me. I bought it you. Come on! Don't be bashful! One at a time!"

But nobody came on.

### Pullman Etiquette.

That our system of railroad travel is not perfect is alleged by "An Englishman" in a recent article. "When you travel in England you are master of your time and your baggage," writes this author. Here, the baggage travels several hours behind its owner. But "a Pullman car at night is the most uncivilized thing on the American continent, and one of the most indecent." It quite fascinates my blues. I sit in the daisy porter strewed by seat with other people's belongings, holds a pillow-case in his teeth and squeezes the pillow into it, and hurls sheets and mattresses about, and pulls at chains and sliding-doors and levers and curtains. Personally I have never mastered either the art of the etiquette of a Pullman car. I never know where to put my shoes, and I feel I shall never learn how to take off my trousers while sitting in them.

### E. R. Knowles Knew His Congregation

A few weeks ago William Jennings Bryan was lecturing in Galt the home preacher and author, Mr. Bryan was entertained at Knox Manse while in Galt. The attendance at the lecture proved disappointingly small, and the discerning lecturer laid this to the door of the rather large admission fee. As he well knows Galt is the Scotchest town in Canada.

After regaining the manse, a few friends being present, Mr. Bryan turned to his host and asked him why, in his opinion, the audience was so small.

"The thing that spoiled it," replied Mr. Knowles, "was the same thing that disorganized the Democratic party."

"What was that?" enquired the statesman.

"It was the silver question," replied the novelist.

### Newspapers in Salonica.

In Salonica, Turkey, there are fifteen newspapers and nine weekly or monthly reviews published, with a total circulation of about 40,000. The newspapers are mostly small two sheet affairs, badly printed on cheap paper. The reading of the newspapers, however, has increased greatly in the last two years and will increase still more when more liberty is given to the press.

Salonica is the meeting-place of the East and West. Nearly all religions in the world have representatives there, and every day of the week is a Sunday to one or other of these religious organizations.

### Not So Particular.

At a dance recently a young gentleman somewhat inferior in social position to most of those present approached an alderman's daughter—"mighty superior" sort—and rather diffidently asked for the favor of a dance.

"The girl looked him stonily in the face for a moment, then turned away with the remark:

"I'm sorry but I'm—well, rather particular as to whom I dance with."  
"Ah, indeed!" was the quiet retort.  
"Can we differ in that respect. I'm not a bit particular. That was why I asked you!"

Then he left her.

### England in 1900.

The British census figures show that at the beginning of this century the population of England and Wales was under nine millions, not very much greater than that of Canada today. In 110 years this population has been quadrupled; a very substantial increase when the smallness of the area is considered, and when account is taken of the large emigration to vast and more sparsely settled regions.

# BEAVER FLOUR

You can't judge quality by size—and this applies to bread as well as to men.

YOU may have an idea because western wheat flour makes a big loaf of bread, that the quality is in keeping with the size. The largest men have not accomplished the greatest deeds.

Size is the only feature that can commend western wheat flour to any cook. And the good cook quickly discovers that quantity without quality is not worth buying.

"BEAVER" FLOUR GIVES BOTH QUALITY AND QUANTITY, because it is a blended flour. It is mostly the choicest Ontario fall wheat with sufficient Manitoba spring wheat to equalize the strength.

In "Beaver" Flour, you get the famous pastry-making qualities of Ontario wheat—you get the fine texture, the evenness and the delicious flavor of Ontario wheat—you get the nutriment of Ontario wheat—with the "strength" of Manitoba wheat which makes the dough "stand up" in the oven.

One of the big conveniences of "Beaver" Flour is the fact that it is equally good for bread and pastry—and best for both.

"Beaver" Flour is superior to any western wheat flour for any and all kinds of baking, and is the cheapest flour you can use because the most economical.

## Don't let repairs eat up your profits

Whether they represent actual cash outlay, or only the time of yourself and your help, repairs are waste just the same. When you make an improvement—no matter how small its cost may be—let it be permanent. Then it is a real investment, something on which you can realize in cash should you decide to sell your property; and something that will pay you constant dividends in convenience, sightliness and comfort as long as the farm remains your own.

### Concrete Improvements Are Permanent

They last as long as the very hills themselves. They do not require experts to build them. Their first cost, in most cases, is no more than for inferior materials.

Aren't you interested in the subject of permanent, modern farm improvements?

Then write for the book that describes hundreds of them—**"WHAT THE FARMER CAN DO WITH CONCRETE"**

It isn't a Catalogue. Every one of its 160 handsomely illustrated pages is interesting and instructive. They tell how to mix concrete, how to place it, what can be done with it. The book was printed to sell for 50 cents, but we have a copy for you, free.
