the Government will heed their cry. Bad as the suffering may be which such raids entail, it is infinitely less than has been suffered by the Bel-gians, Russians, Serbians and Montnegrins and the French within the thea-tre of invasion, and they have endured, and the people of England will not be less ready to endure lesser evils. Ha eful as is the idea of reprisals to the British temperament, the situation is such as now calls for action in this direction, and we should like to see the policy instituted. This appears to be the only way to force the Germans to limit their action to bona-fide competents. batants. From the start of the inva-sion of Belgium, throughout the long period of murders at sea, from the Lusitania horror, and the Persian tragedy, Germany has never hesitated about sacrificing innocent lives. International law, humanity and honor are without meaning to Germany, and only way to bring her to book is policy of an eye for an eye and a tooth for a tooth, and the sooner this is recognized and acted on the soone these frightful deeds will cease.

having started at 12.15 yesterday af-ternoon. There is no direct information to hand yet as to how the fire originated, but it is said to have been originated, but it is said to have been caused by the overturning of a stove in a 'bunk house' which was near the penstock. A mesage received in the city at 4 p.m. yesterday described a part of the plant as being on fire, and at 10 p.m. a further message said that some 50,000 cords of wood of a supply of 100,000 which the Anglo Company had piled for immediate use was then on fire. The latter message stated that the Company's fire brigade with many volunteers from the place were at work, and several supplies of water were being used on the fire. At 10 o'clock this morning some 80,000 cords of wood had been destroyed which means a loss of something like which means a loss of something like half a million dollars to the A.N.D.

EXPLOITS OF ELAINE ATTRACT-IVE AS USUAL.

The recount of the St. John's West ballots was begun yesterday morning, some 1855 votes being examined during the day. Of these, 1700 favored Prohibition and the remaining 155 counted for "wets." No points for argument were brought forward by counsel. At yesterday's count three votes were not allowed, each of them having written words on the ballot. Two of them properly cast would have gone towards the "yes" fund, whilst the third was a decided negative, as the words upon it "No, dear," plainly prove.

The charming holiday programme at the Nickel Theatre attracted large audiences yesterday. At both the afternoon and evening sessions the theatre was crowded. The pictures particularly the sensational serial "The Exploits of Elaine" gave general satisfaction. This evening the films will all be repeated and we strongly advise all our readers who were unable to attend yesterday to be present. The grand war pictures right from Europe, which will be shown at the Nickel Theatre shortly are being looked forward to with the greatest COUNT FNISHED.
